Science Teaching in Schools Great Britain: Parliament: House of Lords: Science and Technology Committee, 2006-11-05
The Committee's report examines science and mathematics teaching in secondary schools in England focusing on the following issues: the take up of science and mathematics at GCSE and A level; the provision of careers advice to students; problems in the recruitment and retention of teachers; the quality of teaching methods; and the role of continuing professional development. The Committee finds that effective science teaching in schools is essential both in order to ensure a satisfactory general level of scientific literacy in society and to enable the next generation of scientists and engineers to progress into higher education and beyond. It argues that the current examination system forces students to study an excessively narrow range of subjects at too early an age and it recommends that the Government should reconsider the Tomlinson proposals for a broader diploma based system for 14-19 year old students based on the International Baccalaureate. This would ensure that students receive a more rounded education and are not made to over specialise before they are able to see the merits of studying science and mathematics. Concerns are also raised about the shortage of science teachers, particularly specialist physics and chemistry teachers; the quality of careers advice in schools; and the importance of practical science in schools.

The Changing Scope of Technoethics in Contemporary Society Luppici, Rocci, 2018-04-13
In the modern era each new innovation poses its own special ethical dilemma. How can human society adapt to these new forms of expression, commerce, government, citizenship and learning while holding onto its ethical and moral principles? *The Changing Scope of Technoethics in Contemporary Society* is a critical scholarly resource that examines the existing intellectual platform within the field of technoethics. Featuring coverage on a broad range of topics such as ethical perspectives on internet safety, technoscience and ethical hacking, communication, this book is geared towards academicians, researchers and students seeking current research on domains of technoethics.

The Temporal Asymmetry of Causation Alison Fernandes, 2023-06-01
Causes always seem to come prior to their effects. What might explain this asymmetry? Causation's temporal asymmetry isn't straightforwardly due to a temporal asymmetry in the laws of nature: the laws are by and large temporally symmetric. Nor does the asymmetry appear due to an asymmetry in time itself. This Element examines recent empirical attempts to explain the temporal asymmetry of causation: statistical mechanical accounts, agency accounts and fork asymmetry accounts. None of these accounts are complete yet and a full explanation of the temporal asymmetry of causation will likely require contributions from all three programs.

Physical Theory Lawrence Sklar, 2014
In nine new essays distinguished philosophers of science discuss outstanding issues in scientific methodology, especially that of the physical sciences, and address philosophical questions that arise in the exploration of the foundations of contemporary science.
