Burke,2015-03-13 The Business of ePublishing 2015

Edition explains in thorough detail what professional publishers designers and traditional independent and hybrid authors need to know about the world and business of digital publishing in 2015 and beyond It goes beyond the rhetoric and paranoid proclamations rampant in social media blogs and news outlets to provide provable unbiased insight into the users devices formats and real world economics of ebooks fixed layout ebooks digital textbooks digital magazines and more for all levels of publishing enterprise small to medium sized publishers indies and self publishers Whether you are an aspiring self publisher or the CEO of a major publishing house a freelance designer or sales person this book provides you with the insight background statistics figures and examples to help you make sense of the business economic and marketing concerns of epublishing and help you plot your future for a successful year in digital publishing Whether your intent is to sell yourself your boss or your clients or if you just want to educate yourself about the realities of the world of epublishing you ll find in this book a cornucopia of important relevant data Handbook of Research on Maximizing Cognitive Learning through Knowledge Visualization Ursyn, Anna,2015-02-28 The representation of abstract data and ideas can be a difficult and tedious

task to handle when learning new concepts however the advances of emerging technology have allowed for new methods of representing such conceptual data The Handbook of Research on Maximizing Cognitive Learning through Knowledge Visualization focuses on the use of visualization technologies to assist in the process of better comprehending scientific concepts data and applications Highlighting the utilization of visual power and the roles of sensory perceptions computer graphics animation and digital storytelling this book is an essential reference source for instructors engineers programmers

and software developers interested in the exchange of information through the visual depiction of data *Unforgettable W. Michael Gray*, 2016-10-12 We have an uneasy relationship with the relentless deluge of information gushing out of academia and our media outlets To turn it off is escapist but to attempt to cognitively grapple with it is overwhelming In *Unforgettable* Enabling Deep and Durable Learning a nationally recognized master teacher gives professors and their students the means to chart a clear path through this information explosion Humans crave explanatory patterns and this book enables teachers to think deeply about their academic disciplines to find and articulate their core explanatory principles and to engage their students in a compelling way of thinking An alternative title for this book could be *Why the Best College Teachers Do What They Do* because the author articulates a compelling rationale that will equip faculty to create and deliver transformative courses Students in transformative courses grapple with essential questions and gain mental muscle that equips them for real world challenges **Super Courses** Ken Bain, 2021-03-09 An exploration of some of the most intriguing college teachers pedagogy challenging traditional learning environments **The Robot Factory** Joseph Ganem, 2018-08-27 This book exposes a disturbing misuse of the scientific method to advance policies and agendas that are in fact detrimental to both science and education The author a physics professor examines two related trends in education the practice of data driven reform and the disparaging of the traditional liberal arts in favor of programs with a heavy emphasis on science and technology Many of the reforms being foisted on educators have more in common with pseudo science than real science The reduction of education to a commodity and the shilling of science as a means to enhance corporate profits lead to an impoverished and stunted understanding of science in particular and of education in general How is it possible for schools with all students learning at grade level to be rated as failing teachers to be rated as ineffective after all their students meet their learning outcomes rising grade school math standards to result in more college students needing remedial math politicians to disparage scientists and their results but argue that more students should study science These bizarre outcomes have happened and are the result of an education system that misuses and misrepresents math and science in the classroom and in crafting education policies This book exposes the flawed and fallacious thinking that is damaging education at all levels throughout the United States and makes a compelling case for rethinking the standardized optimized and quantified approaches in vogue in education today to accommodate the different needs of individual teachers and students
