Fundamentals of Human Geography: Man & environment Open University. Media Development Group,1977 *German Encounters with Modernity* Katherine Roper,2023-08-21 The novels of Imperial Berlin comprise a body of material of immense historical richness Their importance as a historical source lies in the intricate connections their authors make between the individual lives of characters a modernizing city and a newly unified nation These connections and the values and assumptions behind them are the focus of this study In creating these connections as fictional representations of their society Berlin novelists not only reflected societal values but also were molding them by contributing to the social discourse in which they evolved Taken together their works constitute a significant piece in the complicated puzzle of how the society of Imperial Germany as it underwent the social and economic upheavals of modernization transformed the rule of traditional elites into new authoritarian forms Using individual works to analyze fictional treatment of a spectrum of problems of nationhood and modernity I argue that Berlin novelists were using their works for two significant social purposes to search for a German identity that spoke to modern realities and to envision a particularly German revolution that would bring genuine national greatness As the young nation matured however these visions became increasingly elusive They were impeded I suggest by specific obstacles including traumatic historical events inherited cultural ideals powerful mythologies social anxieties and political indifference This book documents what Berlin novelists conceived as a struggle for Germany s soul and traces the stages of its defeat Meeting the Needs of Reunited Refugee Families Sarah Cox,2023-11-14 This book explores the gap between policy practice and academic literature within language learning for refugees and argues that a multilingual approach which combines translanguaging principles decolonising methodology and linguistic hospitality provides a more accessible starting point than current monolingual pedagogies It considers the multilingual and multilateral approach laid out within Scotland s New Scots Refugee Integration Strategy which recognises the importance of linguistic diversity and two way integration The divide between policy practice and theory points towards the need to counteract the dominant monolingual social cohesion narrative through suitable pedagogies which highlight linguistic diversity in a positive way The author suggests ecologising as an alternative language pedagogy drawing on three key findings the significance of decolonising collaborative learner teacher relationships during the liminal phase of refugee arrival the importance of place and orientation and an increased understanding of language and languaging **Handbook on the Experience Economy** Jon Sundbo,Flemming Sørensen,2013-09-30 This illuminating Handbook presents the state of the art in the scientific field of experience economy

s philosophy on the ethics of encountering the other the book argues that Wiebe s writings show that the self s knowledge offers an inadequate basis for ethically valid representations of those encounters In the search for ethical ways of engaging with alterity Wiebe s writings offer new ways of employing silence and the presence of the unknowable as means to explore encounters with alterity Ethical Encounters shows that dividing Wiebe s work into two sharply distinct categories of Mennonite and First Nations writings overlooks important connections between the author s central works and may seriously hinder the interrogation of narrative engagement with alterity While such human encounters resonate against ethical strategies of representation the greatest challenge for the ethics of encounter in Wiebe s texts arises in encounters with the alterity of space Ethical Encounters engages with both physical and narrative spaces which are not permanently fixed in landscape or geography or in human perceptions of place arguing that the most radical expressions of alterity in Wiebe s writings emerge in encounters with the spaces of the Canadian North The study raises questions about the relationship between the self and the other as they concern knowing what does the self know when it claims to know another person or space How does the narrating self negotiate the seeming collapse of its own knowledge when it encounters others whose stories cannot be known Ethical Encounters casts new light not just on Wiebe s writings but also on how we as authors and readers engage with expressions of alterity which refuse to be transformed into familiar knowable forms Janne Korkka is post doctoral researcher and coordinator of the North American Studies programme in the Department of English University of Turku Finland His main research interests lie in the problems of representing space and encountering alterity in Canadian writing He is co editor of Seeking the Self Encountering the Other Diasporic Narrative and the Ethics of Representation 2008 He teaches Canadian and postcolonial literatures and North American Studies and publishes mainly on Canadian writing
