Yesterday, my little sisters challenged me to a game of Scrabble. Usually, I avoid playing games with them because they're terrible cheaters. But their pleading wore me down, and it was raining, so I agreed. We set up the board on the dining-room table, removing Princess, the cat that likes to sleep there. Then we picked our tiles. There are only two blank tiles, and I got them both! Things were looking good. The girls obviously didn't like their tiles: They kept trying to sneak their hands into the tile bag for new ones. There is not much else to say about the game, except that it went on and on and on. When it finally ended, I was more than ready to get out of there. The score? Uhh: 311. Janet: 296. Mei: 64. Ugh. My sisters, of course, had a great time. They're already begging me to play again.

DAZZLE AND DANGER

ANALYZING AUTHOR'S ARGUMENT

Answers will vary but should be similar to the following.

Section 2

How the author uses the support to describe warrior culture in youth sports as harmful:

The author reports that experts put some of the blame for cheerleading injuries on warrior culture, a mentality in which winning is more important than anything, and playing through injury is considered "heroic." She writes that "no pain, no gain" has become the "accepted norm" in youth sports. The author shows that "no pain, no gain" is a problem not only for cheerleaders,

but for other young athletes as well; she does this by providing hypothetical examples of several types of young athletes—soccer players, volleyball players, and football players—playing with injury.

Section 3

Support from the articles:

1. "Instead, Gabby is sharing her hard-learned lessons with others. Last year, she was crowned Miss Teen Minnesota and became a spokesperson for the National Center for Sports Safety. Now she travels the Midwest talking to kids about how to be safe so that no one else will have to suffer the way she has."
2. "In the meantime, Gabby's message to young athletes is simple: 'When your body is hurt, speak up and communicate with a coach, friend, teacher, anyone. You only get one body in life, and you need to honor and respect it.'"

How the author uses the support to share Gabby's message about sports safety:

Gabby Taylor, the author explains, is now a spokesperson for the National Center for Sports Safety. She travels the Midwest talking to kids about how to stay safe. The author shares Gabby's message for other young athletes: "When your body is hurt, speak up and communicate with a coach, friend, teacher, anyone. You only get one body in life, and you need to honor and respect it."

GABBY TAYLOR VIDEO DISCUSSION QUESTIONS

Answers will vary but should be similar to the following:

1. A coping mechanism is a way of thinking or behaving that helps you deal with something difficult. Gabby says that speaking about her injury is her coping mechanism because it gives her something positive to focus on.
2. Gabby is critical of the "no pain, no gain" mentality because this attitude contributed to her injury. Gabby also thinks this mentality leads to repetitive-use injuries. Pushing through pain, Gabby says, is "not worth it."
3. Students may say they learned that Gabby was right-handed and had to learn how to use her left hand; that she

has a puppy that she wants to be able to give it "two-handed belly rubs"; and/or that her doctors are skeptical that Gabby will ever regain use of her arm (though she remains hopeful that she will).

4. Answers will vary. The detail about Gabby's need to switch to her left hand could go in the section "Unbearable Pain." Gabby's desire to use both hands to pet her dog, and about her prognosis, would best fit in the last section of the article.
5. These details may have been less essential to supporting her main points than the details she did include.
6. Yes, the author of "Dazzle and Danger" seems to agree with Gabby that the "no pain, no gain" mentality can be harmful. Gabby believes this mentality makes it harder for kids to speak up when they are hurt. If Gabby had spoken up, she likely would not have sustained as serious an injury. The author connects the "no pain, no gain" mentality to warrior culture, which she says contributes to major injuries because young athletes feel that it's heroic to play through pain.

CHRIS COYNE VIDEO DISCUSSION QUESTIONS

Answers will vary but should be similar to the following:

1. He says that 56 percent of youth football players hide symptoms of their concussions so they can keep playing; he explains post-concussions syndrome; he tells the story of one promising player who had to give up football after suffering his sixth concussion.
2. The symptoms include difficulty with memory, focus, and mood. Chris talks about problems with memory and concentration. He would walk into a room to get a drink and not remember why he was there; he couldn't take notes in class because he couldn't remember what the teacher said long enough to write it down.
3. It is somber and informative. The narrator's voice is serious and the music is sad. The deeply personal narrative is punctuated by powerful statistics about concussions and youth sports.
4. Answers may include: They both suffered

Maximus the Confessor and Evolutionary Biology Andrew P. Jackson, 2024-11-04 This book brings Maximus the Confessor's logoi doctrine into dialogue with modern day evolutionary biology It explores the extent to which the logoi as described by Maximus exhibit features that are concordant with evolution before going on to consider more discordant aspects that cannot be ignored The author addresses the curious resonance between the logoi and evolution in a systematic way through a close reading of primary textual material allied with a deep understanding of both the classical Darwinian and extended evolutionary syntheses The study joins with other Maximian interpreters in attesting to the incarnational and theophanic nature of the logoi but seeks to extend this distinctively Eastern Christo cosmology into the problematic territory of biological evolution a territory historically dominated by Western scholarship The book will be of interest to scholars of religion and science as well as Patristics and the Eastern Orthodox theological traditions

Robert Pasnau, 2013-02-07 Robert Pasnau traces the developments of metaphysical thinking through four rich but for the most part neglected centuries of philosophy running from the thirteenth century through to the seventeenth At no period in the history of philosophy other than perhaps our own have metaphysical problems received the sort of sustained attention they received during the later Middle Ages and never has a whole philosophical tradition come crashing down as quickly and completely as did scholastic philosophy in the seventeenth century The thirty chapters work through various fundamental metaphysical issues sometimes focusing more on scholastic thought sometimes on the seventeenth century Pasnau begins with the first challenges to the classical scholasticism of Bonaventure and Thomas Aquinas runs through prominent figures like John Duns Scotus and William Ockham and ends in the seventeenth century with the end of the first stage of developments in post scholastic philosophy on the continent with Descartes and Gassendi and in England with Boyle and Locke

The New Mechanical Philosophy Stuart Glennan, 2017-08-04 The New Mechanical Philosophy argues for a new image of nature and of science one that understands both natural and social phenomena to be the product of mechanisms and that casts the work of science as an effort to discover and understand those mechanisms Drawing on an expanding literature on mechanisms in physical life and social sciences Stuart Glennan offers an account of the nature of mechanisms and of the models used to represent them A key quality of mechanisms is that they are particulars located at different places and times with no one just like another The crux of the scientist's challenge is to balance the complexity and particularity of mechanisms with our need for representations of them that are abstract and general This volume weaves together metaphysical and methodological questions about mechanisms Metaphysically it explores the implications of the mechanistic framework for our understanding of classical philosophical questions about the nature of objects properties processes events causal relations natural kinds and laws of nature Methodologically the book explores how scientists build models to represent and understand phenomena and the mechanisms responsible for them Using this account of representation Glennan offers a
