World History Jean Caldwell, James Clark, Walter Herscher, 1996. With lessons combining economics and world history, students discover how people and nations developed as a result of making decisions based on maximizing local resources.

Globalisation and National Identity in History Textbooks Joseph Zajda, 2017-07-06. Globalisation and National Identity in History Textbooks: The Russian Federation, the 16th book in the 24 volume book series Globalisation: Comparative Education and Policy Research, discusses trends in dominant discourses of identity politics and nation building in school history textbooks in the Russian Federation (RF). The book addresses one of the most profound examples of the re-writing of history following a geopolitical change. Various book chapters examine debates pertaining to national identity, patriotism, and the nation building process. The book discusses the way in which a new sense of patriotism and nationalism is documented in prescribed Russian history textbooks and in the Russian media debate on history textbooks. It explores the ambivalent and problematic relationship between the state, globalisation, and the construction of cultural identity in prescribed school history textbooks. By focusing on ideology, identity politics, and nation building, the book examines history teachers' responses to the content of history textbooks and how teachers depict key moments in modern Russian history. This book, an essential sourcebook of ideas for researchers, practitioners, and policymakers in the fields of globalisation and history education, provides timely information on history teachers' attitudes towards historical knowledge and historical understanding in prescribed Russian history textbooks.

Handbook of Special Education James M. Kauffman, Daniel P. Hallahan, 2011-05-15. Special education is now an established part of public education in the United States by law and by custom. However, it is still widely misunderstood and continues to be dogged by controversies related to such things as categorization, grouping, assessment, placement, funding, instruction, and a variety of legal issues. The purpose of this 13-part, 57-chapter handbook is to help profile and bring greater clarity to this sprawling and growing field. To ensure consistency across the volume, chapter authors review and integrate existing research, identify strengths and weaknesses, note gaps in the literature, and discuss implications for practice and future research. Key features include:

- Comprehensive Coverage: Fifty-seven chapters cover all aspects of special education in the United States, including cultural and international comparisons.
- Issues/Trends: In addition to synthesizing empirical findings and providing a critical analysis of the status and direction of current research, chapter authors discuss issues related to practice and reflect on trends in thinking.
- Categorical Chapters: In order to provide a comprehensive and comparative treatment of the twelve categorical chapters in section IV, chapter authors were asked to follow a consistent outline: Definition, Causal Factors, Identification, Behavioral Characteristics, Assessment, Educational Programming, and Trends and Issues.
- Expertise: Edited by two of the most accomplished scholars in special education, chapter authors include a carefully chosen mixture of established and rising young stars in the field.

This book is an appropriate reference volume for anyone: researchers, scholars, graduate students, practitioners, policy makers, and parents interested in the state of special education today, its research base, current issues and practices, and future trends. It is also appropriate as a textbook for graduate-level courses in special education.

Discourses of Globalisation, Multiculturalism and Cultural Identity Joseph Zajda, Nitza Davidovitch, Suzanne Majhanovich, 2023-01-01. This book examines dominant discourses in multiculturalism and cultural identity globally. It critiques dominant discourses and debates pertaining to multiculturalism and cultural identity set against the current backdrop of growing social stratification and unequal access to quality education. It addresses current discourses concerning globalisation, ideologies, and the state, as well as approaches to constructing national, ethnic, and religious identities in the global culture. It explores the ambivalent and problematic connections between the state, globalisation, and the construction of

cultural identity The book also explores conceptual frameworks and methodological approaches applicable to research on the state globalisation multiculturalism and identity politics Drawing on diverse paradigms ranging from critical theory to globalisation the book by focusing on globalisation ideology and cultural identity critically examines recent research dealing with cultural diversity and its impact of identity politics Given the need for a multiple perspective approach the authors who have diverse backgrounds and hail from different countries and regions offer a wealth of insights contributing to a more holistic understanding of the nexus between multiculturalism and national identity With contributions from key scholars worldwide the book should be required reading for a broad spectrum of users including policy makers academics graduate students education policy researchers administrators and practitioners

Beyond Edutainment: Exploring the Educational Potential of Computer Games Simon Egenfeldt-Nielsen,2011-01-25 Computer games have attracted much attention over the years mostly attention of the less flattering kind This has been true for computer games focused on entertainment but also for what for years seemed a sure winner edutainment These years the area has gained new momentum and labels game based learning serious games and educational games are just some of them This dissertation aims to be a contribution to understanding educational use of computer games by building a framework that goes beyond edutainment The framework laid out extends from an experiential learning approach where concrete experiences are the starting point that can be transformed through reflection instruction and active experimentation It is concluded that computer games provide rich concrete experience that can be manipulated in the game universe providing more handles for the student compared to other media formats
