The Impact Factor of Scientific and Scholarly Journals Tibor Braun, 2007 The Psychiatry Resident Handbook
Sallie G. De Golia, M.D., M.P.H., Raziya Wang, M.D., 2023-03-31 The Psychiatry Resident Handbook delivers a holistic approach for making the most of the training years addressing issues of identity clinical practice skill building career development and balancing work and a personal life Beyond Power Transitions David C. Kang, Xinru Ma, 2024-10-08
Questions about the likelihood of conflict between the United States and China have dominated international policy discussion for years But the leading theory of power transitions between a declining hegemon and a rising rival is based exclusively on European examples such as the Peloponnesian War as chronicled by Thucydides as well as the rise of Germany under Bismarck and the Anglo German rivalry of the nineteenth and early twentieth centuries What lessons does East Asian history offer for both the power transitions debate and the future of U S China relations Examining the rise and fall of East Asian powers over 1 500 years Beyond Power Transitions offers a new perspective on the forces that shape war and peace Xinru Ma and David C Kang argue that focusing on the East Asian experience underscores domestic risks and constraints on great powers not relative rise and decline in international competition They find that almost every regime transition before the twentieth century was instigated by internal challenges and even the exceptions deviated markedly from the predictions of power transition theory Instead East Asia was stable for a remarkably long time despite massive power differences because of common understandings about countries relative status Provocative and incisive this book challenges prevailing assumptions about the universality of power transition theory and shows why East Asian history has profound implications for international affairs today *Numerical Correlation between Impact Factor and Web Ranking of Electronic Scientific Journals Using Regression Analysis* Giorgos Kouropoulos, Γιώργος Κουρόπουλος, 2017-12-15 The present study attempts to examine the numerical correlation between web ranking of electronic scientific journals and impact factor of these journals using the method of regression analysis Regression analysis allows the option of investigating and predicting the numerical relationship between website ranking of scientific journals on the World Wide Web and the value of impact factor of the journals A sample of 57 publishers with 6 272 scientific journals and 50 standalone scientific journals was analyzed during research procedure In this study two different indicators about websites classification on World Wide Web were examined separately for 57 publishers and 50 standalone journals Alexa rank and Statscrops rank The electronic databases through the internet constitute the main information resources of this study about the impact factors The general conclusion that arises is that the impact factor of electronic scientific journals illustrates a very strong positive correlation with classification of websites on the World Wide Web Furthermore it is concluded that the change of web ranking as a function of impact factor is governed by a Gaussian function or rational function with lower Pearson coefficient and presents non linearly correlation Even if there is very strong correlation between impact factor and web rank for electronic journals the prediction of impact

factor from web rank is not possible and presents many divergences

Waste Management and Environmental Impact XI J.J. Casares , M. Lega, E. Rada, 2022-08-10 Resulting from a merger of two successful events this book contains papers presented at the 11th International Conference on Waste Management and Environmental and Economic Impact on Sustainable Development To prevent emerging threats to environmental and ecological systems we must learn from past failures to avoid repeating similar mistakes Waste management is one of the key problems of modern society due to the ever expanding volume and complexity of discarded domestic and industrial waste and its implications on health and the environment Society is increasingly aware of the need to establish better practices and safer solutions for waste disposal This creates a need for more research on current disposal methods such as landfills incineration chemical and effluent treatment as well as recycling clean technologies waste monitoring public and corporate awareness and general education The desired direction of waste management is towards sustainable strategies that avoid the short term solutions applied in the past The approach which has emerged as the most promising has been called 4Rs where reduction reuse recycling and recovery are seen as the best actions More recently these concepts have given rise to the new model of the Circular Economy which is based on the reuse of what up to now has been considered waste reintroducing them into the production cycle Further steps are required towards the improvement of current technologies increased collaboration between the public government and private sectors and increased involvement of all stakeholders The included research works put a focus on the impact of economic constraints on the environment taking into account the social aspects as well as the over use of natural resources contamination and toxicity Problems of great importance are addressed with the goal of finding constructive and progressive approaches to

ensure sustainability Bibliometric Analysis for Beginners (UUM Press) Aidi Ahmi,2022-12-18 Bibliometric analysis means measuring the properties of all kinds of documents including journal articles conference proceedings books etc These properties can easily be obtained from academic databases such as Scopus Unlike other qualitative studies the bibliometric study requires minimal effort to get the data before it can be analysed It will take less than five minutes to obtain the dataset if the author understands the concept While this study initially comes from the library and information science field it has now become popular among scholars regardless of their areas of interest This study is suitable for anyone who wants to explore the current state of the art of the literature of any field of study Analysis can easily be conducted using several freely available tools such as Harzing's Publish or Perish and VOSviewer Unlike systematic literature review content analysis or meta analysis studies bibliometric research does not require you to download or even read the full content of the data to be analysed This book is suitable for anyone who wants to write and publish their first paper using bibliometric analysis
