theories of fully automated luxury communism have seen art topple from its privileged place within the left's political imaginary as the artist has been reconceived as a prototype of the precarious 24/7 worker. Art and Postcapitalism argues that art remains essential for thinking about the intersection of labour, capitalism and postcapitalism not insofar as it merges work and pleasure but as an example of noncapitalist production. Reassessing the contemporary politics of work by revisiting debates about art, technology and in the nineteenth and twentieth century, Dave Beech challenges the aesthetics of labour in John Ruskin, William Morris and Oscar Wilde with a value theory of the supersession of capitalism that sheds light on the anti-work theory by Silvia Federici, Andre Gorz, Kathi Weeks and Maurizio Lazzarato as well as the technological Cockayne of Srnicek and Williams and Paul Mason. Formulating a critique of contemporary postcapitalism and developing a new understanding of art and labour within the political project of the supersession of value production, this book is essential for activists, scholars and anyone interested in the real and imagined escape routes from capitalism. **The Routledge**

Handbook of Law and Death Marc Trabsky, Imogen Jones, 2024-10-01. The Routledge Handbook of Law and Death provides a comprehensive survey of contemporary scholarship on the intersections of law and death in the 21st century. It showcases how socio-legal scholars have contributed to the critical turn in death studies and how the sociology of death has impacted upon the discipline of law. In bringing together prominent academics and emerging experts from a diverse range of disciplines, the Handbook shows how far from shunning questions of mortality, legal institutions incessantly talk about death. Touching upon the epistemologies and materialities of death and problems of contested deaths and posthumous harms, the Handbook questions what is distinctive about the disciplinary alignment of law and death, how law regulates and manages death in the everyday and how thinking with law can enrich our understandings of the presence of death in our lives. In a time when the world is facing global inequalities in living and dying and legal institutions are increasingly interrogating their relationships to death, this Handbook makes for essential reading for scholars, students and practitioners in law, humanities and the social sciences. **The Oxford Handbook of W. E. B. Du Bois** Aldon D. Morris, Michael Schwartz, Cheryl

Johnson-Odim, Walter R. Allen, Marcus Anthony Hunter, Karida L. Brown, Dan S. Green, 2024. The wide-ranging work of W. E. B. Du Bois, critical to understanding the role that race has played in creating the modern world we find around us, mostly has been ignored or hidden from sociological researchers until after the civil rights movement in the U.S. As a result, one of the key goals of The Oxford Handbook of W. E. B. Du Bois is to reclaim Du Bois from those efforts to marginalize his thought. The chapters of this volume explore in a comprehensive manner all aspects of Du Boisian sociology. It is organized into ten thematic sections: Social Theory, Change and Agency, Sociology, Social Science, Humanities, Public Intellectual, Women and Gender Studies, Methodologies and Archival Resources, Black Interiority and Whiteness, Color Line, Empire, Marxism and War, Talented Tenth and Black Colleges and Universities, Black Community, Religion, Crime and Wealth, Internationalism, Pan-Africanism and Anti-Colonialism. *The Oxford Handbook of Land Politics* Saturnino M. Borrás, Jennifer C.

Franco,2025-08-29 Access to land in all its multiple meanings is necessarily diverse complex and contentious and facilitating and maintaining such access constitutes a mosaic of social relations and institutional instruments rather than the minimalist and simplistic reduction of land to land property that in turn tends to be interpreted always as individual private property The Oxford Handbook of Land Politics offers heterodox analytical tools to help the reader make sense of the complexity of the politics of land

Warmonger Jeremy Kuzmarov,2023-12-01 During the 2016 presidential election many younger voters repudiated Hillary Clinton because of her husband s support for mass incarceration banking deregulation and free trade agreements that led many U S jobs to be shipped overseas Warmonger How Clinton s Malign Foreign Policy Launched the Trajectory from Bush II to Biden shows that Clinton s foreign policy was just as bad as his domestic policy Cultivating an image as a former anti Vietnam War activist to win over the aging hippie set in his early years as president Clinton bombed six countries and by the end of his first term had committed U S troops to 25 separate military operations compared to 17 in Ronald Reagan s two terms Clinton further expanded America s covert empire of overseas surveillance outposts and spying and increased the budget for intelligence spending and the National Endowment for Democracy NED a CIA offshoot which promoted regime change in foreign nations The latter was not surprising because according to CIA operative Cord Meyer Jr Clinton had been recruited into the CIA while a Rhodes Scholar at Oxford and as Governor of Arkansas in the 1980s he had allowed clandestine arms and drug flights to Nicaraguan counter revolutionaries Contras backed by the CIA to be taken from Mena Airport in the western part of the state Rather than being a time of tranquility when the U S failed to pay attention to the gathering storm of terrorism as New York Times columnist David Brooks frames it the Clinton presidency saw rising tensions among the U S China and Russia because of Clinton s malign foreign policies and U S complicity in terrorist acts In so many ways Clinton s presidency set the groundwork for the disasters that were to follow under Bush II Obama Trump and Biden It was Clinton building off of Reagan who first waged a War on Terror ridden with double standards one that adopted terror tactics including extraordinary rendition bombing and the use of drones It was Clinton who cried wolf about human rights abuses and the need to protect beleaguered peoples from genocide to justify military intervention in a post Cold War age And it was Clinton s administration that pressed for regime change in Iraq and raised public alarm about the mythic WMDs all while relying on fancy new military technologies and private military contractors to distance US shady military interventions from the public to limit dissent

Twenty-First Century Anxieties Merle Tönnies, Eckart Voigts, 2022-10-24 The volume uses an interdisciplinary approach to examine how 21st century British theatre increasingly intercuts dystopian and utopian elements to create innovative strategies for addressing current social and political concerns In the case studies a key role is given to the ways in which the selected plays use real and fictional spaces on stage and thereby manage to construct interactional spaces which the spectators are invited to share

iMedia Sarah Kember, 2016-04-05 What can queer feminist writing strategies such as parody and irony do to outsmart the sexism of smart objects environments and materials and open out the new dialecticism of structure and scale critique and creativity Drawing on science and technology studies and feminist theory this book examines the gendering of current and future media technologies such as smart phones Google glass robot nurses tablets and face recognition Kember argues that there is a tendency to affirm and celebrate the existence of smart and often sexist objects environments and materials in themselves to elide writing and other forms of mediation and to engage in disembodied knowledge practices Disembodied knowledge practices tend towards a scientism that currently includes physics envy and are also masculinist Where there is some degree of convergence between masculinist and feminist thinking about objects environments and materials there is also divergence conflict and the possible opening towards a politics of imedia Presenting a lively manifesto for refiguring imedia this book forms an often neglected gender critique of developments in smart technologies and will be essential reading for scholars in Communication Studies Cultural and Media Science and Technology and Feminism
