Endocrine and Metabolic Effects on Maternal-fetal and Neonatal Outcomes Huixia Yang, Moshe Hod, Jie Yan, Cuilin Zhang, 2024-07-10 Pregnancy is a complex state with many endocrine and metabolic challenges to a woman's physiology. Inappropriate maternal endocrine and metabolic changes such as obesity, hyperglycemia, hyperlipidemia, and hypothyroidism may lead to short-term and long-term complications in the mother and offspring. This not only affects population health but also imposes a huge social and economic burden accompanied by significant direct and indirect public health costs. Therefore, the study of endocrine and metabolic effects on maternal-fetal and neonatal outcomes is an especially important research field. These studies will lead to new approaches to predicting metabolic diseases in pregnancy and provide new solutions and effective interventions to prevent or delay those related diseases. Furthermore, they will reveal unknown pathophysiological mechanisms of inappropriate maternal endocrine and metabolic changes during pregnancy and their implications on short-term and long-term complications in the mother and offspring. This could lead to updated diagnosis and treatment strategies for women with endocrine and metabolic diseases during pregnancy. The proposed Research Topic intends to evaluate the pathophysiological mechanisms of inappropriate maternal endocrine and metabolic changes during pregnancy and their implications on short-term and long-term complications in the mother and offspring. The evolving trends in prediction, diagnosis, prevention, and treatment strategies of endocrine and metabolic diseases during pregnancy are also encouraged. In addition, the goal of this research topic is to uncover the characteristics of maternal endocrine and metabolic changes in special populations like twins, women with obesity, gestational diabetes mellitus, pregnancy hypothyroidism, etc. **Brain**

Trials of Imaging and Image-Guided Interventions Nancy A. Obuchowski, G. Scott Gazelle, 2016-02-15 *Handbook for Clinical Trials of Imaging and Image Guided Interventions* is the first single source, multi-disciplinary reference based on the didactic sessions presented at the annual Clinical Trials Methodology Workshop for radiologists, radiation oncologists, and imaging scientists sponsored by the Radiological Society of North America (RSNA). It focuses on educating radiologists, radiation oncologists, and those involved in imaging research with how to design and conduct clinical trials to evaluate imaging technology and imaging biomarkers. The internationally renowned contributors take a broad approach starting with

principles of technology assessment and then move into specific topics covering the clinical trials of therapy and clinical research in imaging guided interventions including radiotherapy They discuss the use of imaging as a predictor of therapeutic response screening trial design and the practicalities of how to run an efficient clinical trial and good working practices Later chapters provide a comprehensive array of quantitative methods including an introduction to statistical considerations in study design biostatistical analysis methods and their role in clinical imaging research methods for quantitative imaging biomarker studies and an introduction to cost effectiveness analysis Handbook for Clinical Trials of Imaging and Image Guided Interventions will educate and prepare radiologists at all levels and in all capacities in planning and conducting clinical imaging trials *Coronary Angioscopy* Kyoichi Mizuno,Masamichi Takano,2015-07-03 This book presents a thorough review of coronary angioscopy ranging from instructions on its use to the latest advances Starting with the structure and fundamental principles of angioscopy it shows readers how to apply the image to comprehensive care of coronary artery patients Plentiful color photos and illustrations will enable readers to investigate and classify plaques and thrombi and to evaluate coronary stent and drug based therapies The authors are leading researchers on angioscopy This book offers the perfect guide not only for new clinicians but also for cardiologists who have already adopted this technique for medical examination and treatment Angioscopy is a unique medical technique for visualizing the interior of blood vessels and helps physicians not only to diagnose the pathology but also to measure the effectiveness of Percutaneous coronary intervention PCI or antiarteriosclerotic drugs Furthermore the recently developed molecular angioscopy approach allows us to observe Low density lipoprotein LDL oxide collagen and macrophages and is rapidly growing in importance

Norm Contestation, Sovereignty and (Ir)responsibility at the International Criminal Court

Emanuela Piccolo Koskimies, 2021-10-26 Grappling specifically with the norm of sovereignty as responsibility the book seeks to advance a critical constructivist understanding of norm development in international society as opposed to the conventional or liberal constructivist mis understanding that still dominates the debate Against this backdrop the book delves into the institutionalization of sovereignty as responsibility within the lived practice of the International Criminal Court ICC More to the point the proposed exploration intends to revive questions about the power laden nature of the normative fabric of international society its dis symmetries and its outright hierarchies in order to devise an original framework to operationalize research on how institutional practice impinges on norm development To this end the book resorts to an original creole vocabulary which combines the contributions of post positivist constructivist scholars with the legacy of key post modernist thinkers such as Michel Foucault and Jacques Derrida as well as critical approaches to International Criminal Law and Post Colonial Studies The book will appeal to scholars of international relations and international law in addition to critical scholars more broadly as well as to practitioners in the fields of human rights and international justice interested in normative theory and the implementation and contestation of international social norms
