Human Performance and Ergonomics brings together a comprehensive and modern account of how the context of
performance is crucial to understanding behavior Environment provides both constraints and opportunities to individuals
such that external conditions may have reciprocal or interactive effects on behavior The book begins with an account of
research in human factors and engineering with application of research to real world environments methodological concerns
and rumination on current and future trends The book proceeds to how technology has moved from being designed to help
human physical survival to helping humans achieve quality of life improvements Real world examples are explored in detail
including hearing technology driving and aviation Issues of control maneuvering and planning are discussed in conjunction
with how intention and expectancy affect behavior The fit between human and environment is examined as a dynamic
interaction and many chapters address the all important human machine communication particularly that between humans
and computers The book closes with a reminder that even our technological environment is filled with other people with
whom we must interact personally or via technology to achieve our larger goals Teamwork is thus discussed for its
integration of cognitive behavioral and affective components toward our achieving desired aims Includes the application of
research in human factors in engineering to real world environments Discussion of both current and future trends is included
