

VN-Matrix® 325 Codecs • Setup Guide

The Extron VN-Matrix 325 encoders/decoders (codecs) distribute digital SD, HD-SDI, or 3G-SDI video using the Extron PURE3® codec. Video signals that are connected to a VNC 325 device configured as an encoder are compressed into a TCP or RTP data stream for transport across a local area or wide area network. At the far end of the network, one or more VNC 325 codecs configured as decoders convert the compressed stream back into the original video signal format.

NOTE: For full installation, configuration, and operation details, see the VN-Matrix 325 User Guide, available at www.extron.com.

IMPORTANT:
Refer to www.extron.com for the complete user guide and installation instructions before connecting the product to the power source.
