1. Clean flash and tips from models.
2. Test fit parts. The brass etching has several parts:
 - The tail rotor goes on the peg on the boom.
 - Assemble the main rotor: the 2 blade piece goes on the fuselage peg, then add the single blade.
 - The "D" shaped piece is the tailskid, and is mounted into the slot in the underside of the tail boom.
 - The inverted "Y" is the rear strut for the main landing gear. The upper (single) tip goes into the recess in the side of the pewter fuselage. The lower tips surround the landing gear's axle, and will be glued to the interior side of the wheels.

When all fit well, glue models together w/ ACC glue

3. Paint model as desired. Dozens of great schemes were used on this important helicopter!
