The Mountain Within Alexander Huber, 2010-06-24. One of the best mountaineers of our generation finally reveals the details of his many exciting extreme alpine ascents, ascents in which his only equipment is a pair of shoes and a small bag for holding chalk. Clinging to the crevasses in mountain walls with muscles bulging as he makes his free ascent, Huber has become one of the world's most recognized and photographed extreme alpine climbers. Along with many other legendary ascents detailed here, he and his brother set a new record of 2 hours and 46 minutes on El Capitan, The Nose, Yosemite Park, in the Fall of 2007, a climb that usually takes three days. When he free soloed the Kommunist's famous peaks, Alexander Huber declared, "Why? For me it is the search for my limits. On the other side, I am aware that the time is limited. With major corporate sponsors like Adidas and Atmoic, this is a fascinating insight into one of the world's best mountaineers."

Ecology & Wonder in the Canadian Rocky Mountain Parks World Heritage Site Robert W. Sandford,2010 Ecology

and Wonder celebrates Western Canada's breathtaking landscape. The book makes several remarkable claims. The greatest cultural achievement in the mountain region of western Canada may be what has been preserved, not what has been developed. Protecting the spine of the Rocky Mountains will preserve crucial ecological functions. Because the process of ecosystem diminishment and species loss has been slowed, an ecological thermostat has been kept alive. This may well be an important defence against future impacts of climate change in the Canadian West.
