Almost Everyone S Guide To Science:

Almost Everyone's Guide to Science John Gribbin, 2015-09-24 John Gribbin is one of the few science writers who is equally comfortable writing about biology as he is about physics and this beginner's guide will take the reader through the basics and the fundamental issues of the crucial areas of modern science from the birth of the universe through to the evolution of our own species the nature of human behaviour and the workings of our minds Crucially the book will not only provide an overview of the central areas in a single volume but will also explain how the areas link up what evolutionary theory has to say about how we think how sub atomic particles came into being in the Big Bang and atoms in stars **The Mother of All Genes** D. Balasubramanian, 2001 **Gaither's Dictionary of Scientific Quotations** Carl C. Gaither, Alma E. Cavazos-Gaither, 2012-01-04 This unprecedented collection of 27 000 quotations is the most comprehensive and carefully researched of its kind covering all fields of science and mathematics With this vast compendium you can readily conceptualize and embrace the written images of scientists laymen politicians novelists playwrights and poets about humankind's scientific achievements Approximately 9000 high quality entries have been added to this new edition to provide a rich selection of quotations for the student the educator and the scientist who would like to introduce a presentation with a relevant quotation that provides perspective and historical background on his subject Gaither's Dictionary of Scientific Quotations Second Edition provides the finest reference source of science quotations for all audiences The new edition adds greater depth to the number of quotations in the various thematic arrangements and also provides new thematic categories

Scientific Writing = Thinking in Words David Lindsay, 2020-05-01 Telling people about research is just as important as doing it But many competent researchers are wary of scientific writing despite its importance for sharpening scientific thinking advancing their career obtaining funding for their work and growing the prestige of their institution This second edition of David Lindsay's popular book *Scientific Writing Thinking in Words* presents a way of thinking about writing that builds on the way good scientists think about research The simple principles in this book will help you to clarify the objectives of your work and present your results with impact Fully updated throughout with practical examples of good and bad writing an expanded chapter on writing for non scientists and a new chapter on writing grant applications this book makes communicating research easier and encourages researchers to write confidently It is an ideal reference for researchers preparing journal articles posters conference presentations reviews and popular articles for students preparing theses and for researchers whose first language is not English **Elements of Chemistry: comprehending all the most important facts and principles in the works of Fourcroy and Chaptal with the addition of the more recent chemical discoveries, etc** Robert HERON (Miscellaneous Writer.), 1800 **Canadian Journal of Science, Literature, and History**, 1854 **Values in Science** Kevin C. Elliott, 2022-06-23 This Element introduces the philosophical literature on values in science by examining four questions 1 How do values influence science 2 Should we actively incorporate values

in science 3 How can we manage values in science responsibly 4 What are some next steps for those who want to help promote responsible roles for values in science It explores arguments for and against the value free ideal for science i e the notion that values should be excluded from scientific reasoning and concludes that it should be rejected Nonetheless this does not mean that value influences are always acceptable The Element explores a range of strategies for distinguishing between appropriate and inappropriate value influences It concludes by proposing an approach for managing values in science that relies on justifying prioritising and implementing norms for scientific research practices and institutions
