design procedure for steel column bases with stiffeners - Aug 15 2023

web bending moment which are transferred into foundations it requires proper design of a column base in the case of small values of bending moments usually a simple base plate with suitable thickness is sufficient calculation of column bases with such geometry is shown in eurocode 3 1

web stiffeners are secondary plates or sections which are attached to beam webs or flanges to stiffen them against out of plane deformations almost all main bridge beams will have stiffeners however most will only have transverse web stiffeners i e vertical stiffeners attached to the web deep beams sometimes also have longitudinal web stiffeners
