Brutal Brian Luke, 2007 Explores the gender divide over our treatment of animals exposing the central role of masculinity in systems of animal exploitation including hunting Luke develops a new theory of how exploitative institutions do not work to promote human flourishing but instead merely act as support for a particular construction of manhood from publisher description *Handbook of Sport and Japan* Helen Macnaughtan, Verity Postlethwaite, 2025-10-01 The Handbook of Sport and Japan presents a fascinating collection of established and new scholarship a valuable text for readers who want to use sport as lens to look more closely into a nation The handbook draws on a diversity of perspectives disciplines and experiences all of which respond to the challenge of including sport in the study of Japan The chapters in the handbook convey what taking part in sport feels and looks like highlighting the sporting accomplishments of Japanese athletes and teams while also reflecting how the sporting experience interacts with economics diplomacy media culture demographics gender ethnicity and identity Contributions pose key questions about what conclusions can be made when sport is placed in the foreground of key events in Japanese history including pre war industrialisation and empire building to the post war economic boom the 2011 Tohoku Disaster and the recent COVID 19 pandemic **Psychology After Deconstruction** Ian Parker, 2014-05-23 Ian

Parker has been a leading light in the fields of critical and discursive psychology for over 25 years. The *Psychology After Critique* series brings together for the first time his most important papers. Each volume in the series has been prepared by Ian Parker and presents a newly written introduction and focused overview of a key topic area. *Psychology After Deconstruction* is the second volume in the series and addresses three important questions: What is deconstruction and how does it apply to psychology? How does deconstruction radicalize social constructionist approaches in psychology? What is the future for radical conceptual and empirical research? The book provides a clear account of deconstruction and the different varieties of this approach at work inside and outside the discipline of psychology. In the opening chapters Parker describes the challenge to underlying assumptions of neutrality or objectivity within psychology that deconstruction poses and its implications for three key concepts: humanism, interpretation and reflexivity. Subsequent chapters introduce several lines of debate and discuss their relation to mainstream axioms such as psychopathology, diagnosis and psychotherapy and alternative approaches like qualitative research, humanistic psychology and discourse analysis. Together the chapters in this book show how via a process of erasure, deconstructive approaches question fundamental assumptions made about language and reality, the self and the social world. By demonstrating the application of deconstruction to different areas of psychology, it also seeks to provide a social reconstruction of psychological research. *Psychology After Deconstruction* is essential reading for students and researchers in psychology, sociology, social anthropology and cultural studies and for discourse analysts of different traditions. It will also introduce key ideas and debates within deconstruction to undergraduates and postgraduate students across the social sciences.
