

Animal Farm Chapter Four Questions

Directions: Answer each in a complete sentence. Use textual evidence to support your response.

1. What do Snowball and Napoleon do to encourage the spread of Animalism?

Snowball and Napoleon encourage the spread of Animalism by sending "out flights of pigeons whose instructions were to mingle with the animals on neighboring farms" (Orwell, 54).

2. Who are Frederick and Pilkington?

Frederick and Pilkington are the owners of the farms that reside on each side of Animal Farm.

3. In what ways do the humans try and stop the spread of Animalism?

The humans try and stop the spread of Animalism by stating "the animals there practiced cannibalism, tortured one another with red-hot horseshoes, and had females in common" (Orwell, 55). They were basically trying to spread lies so that the animals would not want to rebel.

4. Where does Snowball get his ideas for defending Animal Farm?

Snowball gets his ideas for defending Animal Farm by studying "an old book of Julius Caesar's campaigns" (Orwell, 57).

5. Describe how the animals are able to successfully defend the farm against the humans.

The animals are able to successfully defend the farm against the humans by working together and strategically planning their defenses.

6. Which animals are injured or killed during the battle?

During the battle, Snowball is injured and one sheep is killed.

7. How do the animals celebrate their victory?

The animals celebrate their victory by reassembling "in the wildest excitement, each recounting his own exploits in the battle" (Orwell, 59).

They also hoisted the flag and sung *Beasts of England*.

8. What part does Napoleon play during the Battle of the Cowshed? What do you think this says about him? During the Battle of the Cowshed, Napoleon was not present whatsoever. His lack of presence shows that Napoleon does not care for the well-being of everyone and does not share in the defense of the farm.

How to Think about Data Science Diego Miranda-Saavedra, 2022-12-23 This book is a timely and critical introduction for those interested in what data science is and isn't and how it should be applied The language is conversational and the content is accessible for readers without a quantitative or computational background but at the same time it is also a practical overview of the field for the more technical readers The overarching goal is to demystify the field and teach the reader how to develop an analytical mindset instead of following recipes The book takes the scientist's approach of focusing on asking the right question at every step as this is the single most important factor contributing to the success of a data science project Upon finishing this book the reader should be asking more questions than I have answered This book is therefore a practising scientist's approach to explaining data science through questions and examples

Korthals, 2008-11-09 This book is an extensive original and systematic treatment of many important philosophical and ethical aspects of food consumption and production May we eat just anything Can we do everything with animals even genetic modification If not how can we regulate those processes so that they lead to optimum animal welfare while at the same time producing optimum taste The production of food also causes environmental pollution does the fight against hunger have priority over the care of the environment The care of the environment animal welfare and the quality of food should be in a certain harmony but that is far from granted and hardly easy to achieve These factors are often in conflict with each other and a balance will thus need to be searched for Other factors to take into consideration are the issue of global famine the care for a farming class that is able to keep its head above water in a decent way and a fair trade system that does not throw up unnecessary barriers for newcomers or small market participants and that promotes good nutrition Famine continues to be a widespread phenomenon that violates human rights causing nearly a billion people to suffer from hunger or malnutrition

At the same time deliberate hunger abundance and obesity are prevalent in the Western world Both issues refer to the social and cultural aspects of food Scientific and technological developments like genetic modification and functional food also play an increasingly important role almost every bite that we take is determined by scientific developments An extra difficulty is that scientific information is often contradictory or that it relies on statistical probabilities that are difficult to translate into everyday certitudes All of these factors deserve attention but it is the mix that is most important In the land of food either or does not exist only both and The adequate measure of both and serves as the starting point for this philosophical reflection Before Dinner is a must read for all people interested in contemporary ethical issues of food such as university students and researchers of food agricultural and life sciences as well as policymakers in these fields such as members of professional organisations focusing on food and agriculture f e EURSAFE European Society for Agriculture and Food Ethics the Agriculture Food and Human Values Society USA and European Federation of Biotechnology *More Than a Meal* Karen Davis, 2001 This scholarly and authoritative book examines the cultural and literal history as well as the natural history and biological needs and concerns of turkeys Davis explores how turkeys came to be seen as birds who were not only the epitome of failure or stupidity but also the suitable centerpiece of the celebration of freedom in America itself Thanksgiving She examines the many varieties of turkeys and uncovers the methods by which millions of turkeys are raised fattened and slaughtered on farms around America today Davis takes us back to European folklore about turkeys the myths fairytales and downright lies told about turkeys and their habits and habitats She shows how turkeys in the wild have complex lives and family units and how they were an integral part of Native American and continental cultures and landscape before the Europeans arrived Finally Davis draws conclusions about our paradoxical complex and bestial relationship not just with turkeys but with all birds and thus with all other animals She examines how our treatment of animals shapes our other values about ourselves our relationship with other human beings and our attitude toward the land nation and the world
