Daniel, 2007-06-30 Behavioral Mechanisms in Evolutionary Ecology Leslie Real, 1994-12-15 The first book length exploration of behavioral mechanisms in evolutionary ecology this ambitious volume illuminates long standing questions about cause and effect relations between an animal's behavior and its environment By focusing on biological mechanisms the sum of an animal's cognitive neural developmental and hormonal processes leading researchers demonstrate how the integrated study of animal physiology cognitive processes and social interaction can yield an enriched understanding of behavior With studies of species ranging from insects to primates the contributors examine how various animals identify and use environmental resources and deal with ecological constraints as well as the roles of learning communication and cognitive aspects of social interaction in behavioral evolution Taken together the chapters demonstrate how the study of internal mechanistic foundations of behavior in relation to their ecological and evolutionary contexts and outcomes provides valuable insight into such behaviors as predation mating and dispersal Behavioral Mechanisms in Evolutionary Ecology shows how a mechanistic approach unites various levels of biological organization to provide a broader understanding of the biological bases of behavioral evolution Studyguide for Animal Behavior Cram101 Textbook Reviews, 2013-05 Never HIGHLIGHT a Book Again Includes all testable terms concepts persons places and events Cram101 Just the FACTS101 studyguides gives all of the outlines highlights and quizzes for your textbook with optional online comprehensive practice tests Only Cram101 is Textbook Specific Accompanies 9780872893795 This item is printed on demand *Studyguide for Animal Behavior* John Alcock, Cram101 Textbook Reviews, 2012-09 Never HIGHLIGHT a Book Again Virtually all of the testable terms concepts persons places and events from the textbook are included Cram101 Just the FACTS101 studyguides give all of the outlines highlights notes and quizzes for your textbook with optional online comprehensive practice tests Only Cram101 is Textbook Specific Accompanys 9780878932252 *Animal Behaviour* Peter M. Maier, Barbara M. Maier, 1970 *The Triumph of Sociobiology* John Alcock, 2001 In The Triumph of Sociobiology John Alcock reviews the controversy that has surrounded evolutionary studies of human social behavior following the 1975 publication of E O Wilson's classic Sociobiology The New Synthesis Denounced vehemently as an ideology that has justified social evils and inequalities sociobiology has survived the assault Twenty five years after the field was named by Wilson the approach he championed has successfully demonstrated its value in the study of animal behavior including the behavior of our own

species Yet misconceptions remain to our disadvantage In this straight forward objective approach to the sociobiology debate noted animal behaviorist John Alcock illuminates how sociobiologists study behavior in all species He confronts the chief scientific and ideological objections head on with a compelling analysis of case histories that involve such topics as sexual jealousy beauty gender difference parent offspring relations and rape In so doing he shows that sociobiology provides the most satisfactory scientific analysis of social behavior available today Alcock challenges the notion that sociobiology depends on genetic determinism while showing the shortcoming of competing approaches that rely on cultural or environmental determinism He also presents the practical applications of sociobiology and the progress sociobiological research has made in the search for a more complete understanding of human activities His reminder that natural behavior is not moral behavior should quiet opponents fearing misapplication of evolutionary theory to our species The key misconceptions about this evolutionary field are dissected one by one as the author shows why sociobiologists have had so much success in explaining the puzzling and fascinating social behavior of nonhuman animals and humans alike
