Time Will Tell Yemi Elegunde, 2014-01-02 From the bright lights of London s Holland Park into the power cuts and very rural life of Lagos state in Nigeria all in the blink of an eye This is the true story of a family torn apart by International Parental Child Abduction In September 1973 Yemi was just seven years old when he and his younger sister were taken away from England by their dad without their mum s knowledge or consent They lived and grew up in Nigeria for over fourteen years where the only communication they had with their mum was by letters Without social media computers or mobile phones how does a mother track down her missing children How do the children adapt to the sudden change of lifestyle This is the story of the events through the eyes of that seven year old child from the moment he realised he was in a different country Yemi relates the stark change of culture the new family and the voyage of self discovery The book covers his roller coaster young life of apprehensions and ecstasy his rebellions and his loves It follows his anger as he grew from boy to teenager and his eventual reconciliation with himself and his parents What kind of man would that boy grow up to be Time Will Tell Featured in The Bookseller

The Battle of the Fields Brian Short, 2014 This book will appeal not only to historians and geographers but to many who maintain a deep interest in the British countryside and its past and to those who continue to share a fascination for the Second World War in particular the home front The Battle of the Fields tells the story of rural community and authority in Britain during the Second World War by looking at the County War Agricultural Executive Committees From 1939 they were imbued with powers to transform British farming to combat the loss of food imports caused by German naval activity and initial European mainland successes Their powers were sweeping and draconian When fully exercised against recalcitrant farmers dispossession in part or whole could and did result This book includes the most detailed analysis of these dispossessions including the tragic case of Ray Walden the Hampshire farmer who was killed by police after refusing to leave his farmhouse in 1940 The committees were deemed successful by Whitehall as harbingers of modernity mechanization draining artificial fertilizers reclamation of heaths marshes and woodlands We now deplore some of these changes but Britain did not starve in large part thanks to their efforts This book will appeal not only to historians and geographers but to many who maintain a deep interest in the British countryside and its past and to those who continue to share a fascination for the Second World War in particular the home front It will also demonstrate to all who are anxious about food security in the modern age how this question was dealt with 70 years ago BRIAN SHORT is Emeritus Professor of Historical Geography at the University of Sussex and formerly Dean of School and Head of the Department of Geography

Education in Nigeria Daniel A. Nomishan, 2014-12-26 This book Education in Nigeria

Reflections and Global Perspectives provides a broad overview of education in Nigeria. It recognizes the vital role education plays in the development of Nigeria and has attempted to air the concerns and call of the Nigerian public as well as educators for reform in the educational system in Nigeria. The book further recognizes that Nigerian education continues to be evolved first into a system of Western European education and then into a global system of education. It attempts to examine the status of education in Nigeria and thereby seeks solutions by exploring Nigeria's and global historical perspectives, current trends and future directions regarding students and learning, teachers and teaching, the school curriculum and administration of schools. It is expected that the comprehensive nature of the text will be beneficial to individuals in teacher preparation programs as well as those who plan to work with children in pre-kindergarten, nursery through secondary settings. The chapter content of the book focuses on the variation of thought as to the principal objectives of educators to help students in Nigeria develop habits, skills and ideas and help them to think. It adds to the importance of providing education to all, especially at the time when Nigeria is frankly making an effort to affirm democracy. For any nation to be truly democratic, it must maintain an educated electorate. Education prepares people to make informed decisions that affect the society. All children in Nigeria should therefore receive an education to prepare them to become effective members of the world society. This book seeks to examine and reflect on education in Nigeria and globally.

Assessment in Geographical Education: An International Perspective Theresa Bourke, Reece Mills, Rod Lane, 2022-02-27. In recent years, there has been increased attention paid to the importance of assessment in Geographical Education, the chosen subject for this book. Assessment is an important tool for collecting information about student learning and for providing timely data to inform key stakeholders including students, teachers, parents and policymakers. To be effective, assessment needs to be valid, reliable and fair. Validity is about ensuring that we assess what we claim we are assessing. Reliability is about measuring performance and understanding in a consistent way. Without validity and reliability, assessment is unlikely to provide equitable opportunities for students to demonstrate what they know and can do. As geography educators, it is therefore important that we identify the core concepts and skills in geography that we want students to master. We need a clear understanding of what the progression of learning looks like for each concept and skill so we can develop fit-for-purpose assessments that track and improve student learning. While there is a substantial literature on evidence-based assessment in secondary school contexts, research exploring best practice assessment in geography is rare. This is a concern given the distinctive nature of geography and the important role of assessment in the learning process. This scholarly collection seeks to address this issue by connecting research in educational

assessment with the domain of geography The chapters are written by leading researchers in Geographical Education from across the globe These chapters provide examples of innovation through the collective voices of geography teacher educator scholars from across Australia USA South Korea Germany Switzerland and Singapore What unifies the work in this book is that each chapter focuses on a key feature of the discipline of geography providing scholarly examples of evidence based practices for assessing student s knowledge and skills
