2015 2nd Language Higher Sendory Suggetion:

Understanding Variability in Second Language Acquisition, Bilingualism, and Cognition Kristin Kersten, Adam Winsler, 2022-07-29 This collection brings together linguistic psychological and sociological perspectives reflecting on the relationships and interactions of the multilayered factors impacting second language development and cognitive competence. The book advocates a system approach as a counterpoint to existing scholarship which has tended to focus on a small set of variables. The 13 chapters demonstrate the ways in which cognitive and linguistic development are intrinsically linked occurring within a nested structure of multiple levels: individual neuro cognitive systems and processes; individual engagement with the social world and the wider social and institutional environments; and cultural contexts affecting the belief systems and linguistic conventions of social groups. The volume begins by outlining the theoretical and methodological foundations before moving into a more focused look at the interplay of these different variables at the macro, meso, and micro levels. A final section features two commentary chapters from linguistics and psychology respectively synthesizing insights from earlier chapters and situating the collection within broader scholarship on linguistic and cognitive development, theoretical and methodological implications, and discussions of avenues for future empirical research. This book will be of particular interest to scholars in second language acquisition, psycholinguistics, cognition, psychology, and sociology.

Personality and Emotional Intelligence in Second Language Learning Katarzyna Ożańska-Ponikwia, 2018-07-27 This book addresses a particularly important area of second language acquisition research: specifically, the factors that mediate learning outcomes in learning a second or foreign language. It provides a comprehensive up-to-date overview of studies in the field of second language learning and L2 use from the point of view of personality traits and emotional intelligence. It also presents results of a mixed method study researching the possible influence of these variables on the process of learning a second language. Furthermore, the book represents the first systematic exploration of the role of emotional intelligence and the factors related to it in moderating attainment in the target language. What is also unique here is the investigation of the role of personality with respect to different target language skills and subsystems, which allows for finer grained insights into this relationship. The book will be of considerable interest to both researchers, teachers, and students in the fields of SLA, TESOL, applied linguistics, and bilingualism.

Understanding the Emotions of Second Language Writing Teachers Feng Geng, Shulin Yu, 2024-08-16 This book incorporates both practice-based information and research to underpin teachers' emotions in the teaching and learning settings of second language L2 writing in the Chinese tertiary educational context. It introduces and validates a new conceptual framework for evaluating the causes and effects of the emotions of L2 writing teachers and investigates their emotional experiences in the context of the classroom. Additionally, it demonstrates the mediating effect of emotion regulation strategies on L2 writing teachers' pedagogical practices, writing assessment practices, teacher-student relationships, and well-being. Finally, this book provides theoretical, practical, and pedagogical implications of
