Break the Stigma: Autism Nichole E Scheerer ,April Hargreaves ,Catalina Sau Man Ng ,Matthew Daniel Lerner, 2024-12-17 While awareness of neurodiversity and specific forms of neurodivergence such as autism has increased over the last few years autism stigma and prejudice against autistic people remains a critical issue that warrants further attention and investigation The experience of stigma and prejudice such as discriminatory actions and attitudes towards autistic individuals on both a personal and public level can have many negative impacts across one s lifetime These experiences can lead people on the autism spectrum and their families to avoid seeking help which can delay diagnosis and access to supportive services of not only autism itself but also co occurring physical and psychological health needs Prejudiced beliefs against autistic people may lead to many forms of discrimination including but not limited to medical education and employment discrimination These attitudes can be built into society at a systemic level and influence policies that govern access to supports and our communities Additionally autism stigma and prejudice against autistic people such as stereotypical portrayals of autistic people in media and the language we use to describe autistic people can be invalidating to a person s autistic identity and to autistic culture Further the impacts of stigma and prejudice can be internalized by autistic individuals which may not only have poor effects on their wellbeing but also increase the want and or need to mask or camouflage to pass as non autistic Masking or camouflaging can reduce a person s sense of belonging self esteem sense of self worth and close relationships all of which are associated with poor outcomes It can also lead to avoidance of opportunities such as connection with other autistic individuals that could increase quality of life This Research Topic aims to showcase evidence on why the stigma surrounding autism and the prejudice against autistic people are so

detrimental It hopes to provide insights into research and interventions on how stigma and prejudice can be tackled as well as awareness understanding and acceptance raised in the hope that the research presented will translate to best practice applications in clinical public health policy and community settings We invite researchers to submit a range of articles including but not limited to original research articles reviews meta analyses opinions perspectives and case reports to provide new evidence on the following Harmful impacts of stigma and prejudice on autistic people Interventions on reducing stigma surrounding and prejudice against autistic people Health promotion in autism i e approaches that increase the mental and physical well being of autistic people Interventions targeted at increasing understanding of autism and neurodiversity as well as increasing acceptance and advocacy of as well as allyship with autistic people Examining intersectionality in autism stigma and or prejudice towards autistic people of diverse backgrounds **CPP Study Guide** James R. Bomba, Philip S. Deming, ASIS International, 2005 **The Sustainable City XV** S. Syngellakis, 2021-12-13 Consisting of presented papers from the 15th International Conference on Urban Regeneration and Sustainability the included works address various aspects of the urban environment and provide solutions leading towards sustainability Urban areas result in a series of environmental challenges varying from the consumption of natural resources and the subsequent generation of waste and pollution contributing to the development of social and economic imbalances As cities continue to grow all over the world these problems tend to become more acute and require the development of new solutions The challenge of planning sustainable contemporary cities lies in considering the dynamics of urban systems exchange of energy and matter and the function and maintenance of ordered structures directly or indirectly supplied and maintained by natural systems The task of researchers is to improve the capacity to manage human activities pursuing welfare and prosperity in the urban environment Any investigation or planning on a city ought to consider the relationships between the parts and their connections with the living world The dynamics of its networks flows of energy matter people goods information and other resources are fundamental for an understanding of the evolving nature of today s cities Large cities represent a fertile ground for architects engineers city planners social and political scientists and other professionals able to conceive new ideas and time them according to technological advances and human requirements Coastal areas and coastal cities are an important area covered in this volume as they have some specific features Their strategic location facilitates transportation and the development of related activities but this requires the existence of large ports with the corresponding increase in maritime and road traffic and all its inherent negative effects This requires the development of well planned and managed urban environments not only for reasons of efficiency and economics but also to avoid inflicting environmental degradation that causes the deterioration of natural resources quality of life and human health These research papers put a focus on sustainability across the multidisciplinary components of urban planning the challenges presented by the increasing size of cities the number of resources required and the complexity of modern society **Risk Analysis and Security**

Countermeasure Selection Thomas L. Norman CPP/PSP/CSC,2015-07-01 This new edition of Risk Analysis and Security Countermeasure Selection presents updated case studies and introduces existing and new methodologies and technologies for addressing existing and future threats It covers risk analysis methodologies approved by the U S Department of Homeland Security and shows how to apply them to other organizations
