**Children's Lived Experience of Poverty and Vulnerability in Kenya** Elizabeth Ngutuku, 2025-01-29 Drawing from ethnographic research this book presents children's lived experience of poverty and vulnerability in Kenya. By taking the case of Siaya Kenya which has some of the lowest indicators of child well-being, the book presents children's complex lived experience from three interlinked everyday spaces of the home, the school and support programmes. It argues that children's experience is formed at the interstices of material lack, historically as well as politically located factors and the complex context of social relations. The book is anchored in an innovative methodology of listening softly to children's voice. Aimed at fully capturing children's experience, listening softly focusses on the different ways that children's voice happens. The book challenges scholarship to go beyond multi-dimensionality and re-imagine children's experience as complex and entangled, using methods that are attuned to capturing children's messy experience of poverty and be widely awake in each intervention context to capture the emergent, fluid experience of children. Presenting a non-linear, contextual, entangled and complex experience of poverty and vulnerability, this book will be of interest to scholars and students in the field of Poverty Studies, Development Studies, Childhood Studies, Social Policy, Critical studies, Human and Child Rights and African Studies.

**Promoting Gender Equity in Selected Public Universities of Kenya** Jane Onsongo, 2011 The purpose of this study was to examine sustainable gender equity interventions in selected public universities. The study used descriptive survey and case study research methods to carry out an in-depth analysis of the gender equity interventions in selected public universities in Kenya. The sample consisted of four public universities that were selected because they had established gender centers/institutes that were assumed to be coordinating gender equity intervention. The study has the following objectives: To establish the existing gender inequalities in the formal organisational structure of the selected universities; To identify and assess sustainability of gender equity interventions in the selected public universities; To analyse the national, regional, international and organisational culture and policy contexts that have influenced and supported the introduction of the identified gender equity interventions; To investigate the attitudes of staff, students and management towards the gender equity interventions; and to recommend appropriate institutional strategies to address existing gender inequities. **The**
