Spatial Practices, 2018-06-26 The edited collection *Spatial Practices Territory Border and Infrastructure in Africa* presents research findings from the German Research Council's Priority Programme 1448 *Adaptation and Change in Africa 2011-2018*. At the heart of the volume are important new spatial practices that have emerged after the end of the Cold War in the fields of conflict, climate change, migration and urban development to name but a few and their ordering effects with regard to social relations. These findings bear particular relevance for the co-production of territorialities and sovereignties for borders and migrations as well as infrastructures and orders. Drummond, Jean-Luc Gaudiot, Alba Melo, Maicon Melo Alves, Philippe Olivier Alexandre Navaux, 2023-07-05 This book brings a thorough explanation on the path needed to use cloud computing technologies to run High Performance Computing (HPC) applications. Besides presenting the motivation behind moving HPC applications to the cloud, it covers both essential and advanced issues on this topic such as deploying HPC applications and infrastructures, designing cloud friendly HPC applications and optimizing a provisioned cloud infrastructure to run this family of applications. Additionally, this book also describes the best practices to maintain and keep running HPC applications in the cloud by employing fault tolerance techniques and avoiding resource wastage. To give practical meaning to topics covered in this book, it brings some case studies where HPC applications used in relevant scientific areas like Bioinformatics and Oil and Gas industry were moved to the cloud. Moreover, it also discusses how to train deep learning models in the cloud, elucidating the key components and aspects necessary to train these models via different types of services offered by cloud providers. Despite the vast bibliography about cloud computing and HPC, to the best of our knowledge, no existing manuscript has comprehensively covered these topics and discussed the steps, methods and strategies to execute HPC applications in clouds. Therefore, we believe this title is useful for IT professionals and students and researchers interested in cutting edge technologies, concepts and insights focusing on the use of cloud technologies to run HPC applications. **CAA2015. Rennert, 2016-05-30 Cancer care is undergoing a radical transformation as novel technologies are directed toward new treatments and personalized medicine The most dramatic advances in the treatment of cancer have come from therapeutics that augment the immune response to tumors The immune checkpoint inhibitors are the best known and most highly advanced examples of Immune Therapeutics targeting tumor cells and include approved antibody drugs directed at the cell surface proteins CTLA4 and PD 1 These are now considered foundational treatments for several solid tumor indications and that list of indications is growing quickly More broadly antibodies have become workhorse molecules across the entire immunotherapy landscape Antibodies to novel targets modulate the activity of diverse immune cell regulatory proteins Engineered antibodies can induce tumor cell death or expose tumor cells to poisonous toxins ADCC and ADC respectively Bi specific antibodies can engage multiple tumor targets simultaneously or can redirect lymphocytes to attack tumor cells The antigen binding domains within antibodies can be spliced onto cell stimulatory domains and transduced into T cells or NK cells creating remarkable tumor specific cellular therapeutics CAR T CAR NK Beyond antibody based therapies there are highly diverse and differentiated technology tool kits being applied to immunotherapy Small

molecule drugs are being developed to attack the tumor microenvironment novel tumor vaccine approaches are showing great promise patient lymphocytes are being isolated expanded and reintroduced to patients gene editing techniques are becoming widely deployed and a vast number of new tumor targets and mutated tumor proteins neoantigens are being discovered The past decade has seen unprecedented success in the treatment of diverse cancers The authors of this volume have been asked to not only review progress to date but importantly to look ahead and anticipate the evolution of cancer treatment across diverse Immune Therapeutic approaches Our hypothesis is that the advances we are seeing across the immunotherapy landscape will further evolve and synergize leading us finally to outright cures for many cancers
