All Politics Is Global Daniel W. Drezner, 2008-08-18 Has globalization diluted the power of national governments to regulate their own economies Are international governmental and nongovernmental organizations weakening the hold of nation states on global regulatory agendas Many observers think so But in All Politics Is Global Daniel Drezner argues that this view is wrong Despite globalization states especially the great powers still dominate international regulatory regimes and the regulatory goals of states are driven by their domestic interests As Drezner shows state size still matters The great powers the United States and the European Union remain the key players in writing global regulations and their power is due to the size of their internal economic markets If they agree there will be effective global governance If they don't agree governance will be fragmented or ineffective And paradoxically the most powerful sources of great power preferences are the least globalized elements of their economies Testing this revisionist model of global regulatory governance on an unusually wide variety of cases including the Internet finance genetically modified organisms and intellectual property rights Drezner shows why there is such disparity in the strength of international regulations

The Regulation of Agricultural Subsidies in the World Trade Organization Framework. A Developing Country Perspective Farai Chigavazira, 2016-09 The Agreement on Agriculture AoA was adopted to eliminate the illegitimate use of trade distorting agricultural subsidies and thereby reduce and avoid the negative effects subsidies have on global agricultural trade However the AoA has been fashioned in a way that is enabling developed countries to continue high levels of protectionism through subsidization whilst many developing countries are facing severe and often damaging competition from imports artificially cheapened through subsidies The regulation of subsidies by the World Trade Organisation WTO has been a highly sensitive issue This is mainly due to the fear of compromising on food security especially by developed countries Developing countries have suffered negatively from the subsidy programmes of developed countries which continue to subsidize their agricultural sector This position of developing countries in the global trade system which has been described as weak has drawn criticism of the WTO namely that it does not protect the interests of the weak developing nations but rather strengthens the interests of the strong developed nations The green box provisions which are specifically designed to regulate payments that are considered trade neutral or minimally

trade distorting have grossly been manipulated by developed countries at the mercy of the AoA Developed countries continue to provide trade distorting subsidies under the guise of green box support This is defeating the aims and objectives of the AoA The study examines the regulation of WTO agricultural subsidies from the developing countries perspective It looks at the problems WTO member states face with trade distorting subsidies but focuses more on the impact these have on developing states It scrutinizes the AoA s provisions regulating subsidies by adopting a perspective to identify any loopholes or shortcomings which undermine the interests and aspirations of developing countries This is against the background that some of the provisions of the AoA are lenient towards the needs of developed countries at the expense of developing countries
