 policy has directed that nation s economy through nearly three decades of spectacular growth But the authors of this paper
 maintain that this policy is showing signs of being outmoded The time has come the authors argue for the Korean
 government to stop managing the economy s structural development and to redefine the responsibilities of business and
 government Under this proposed compact the allocation of resources would shift from the government to the private
 industrial and financial sectors The transformation of the government bureaucracy from an ad hoc policy role to one of a
 transparent and predictable regulator is a key to the success of this undertaking These new directions would present the
 government with enormous challenges Greater competitive discipline and regulatory oversight would be required While
 dealing with the complexities of the transition the government would have to maintain macroeconomic stability and the
 momentum of savings and investment For comparison the study examines the industrial economies of France Germany Japan
