Computer Aided Process and Product Engineering (CAPE) Luis Puigjaner, Georges Heyen, 2007-01-02 Computer aided process engineering CAPE tools have been very successfully used in process design and product engineering for a long time In particular simulation and modelling tools have enabled engineers to analyse and understand the behaviour of selected processes prior to building actual plants The aim of design or retrofit of chemical processes is to produce profitably products that satisfy the societal needs ensuring safe and reliable operation of each process as well as minimising any effects on the environment This involves the conceptual design or retrofit of plants and processes novel manufacturing approaches process control system design interactions and operability manufacturability environmental and safety issues Backed by current studies this 2 volume set gives a comprehensive survey of the various approaches and latest developments on the use of CAPE in the process industry An invaluable reference to the scientific and industrial community in the field of computer aided process and product engineering

Resource Efficiency of Processing Plants Stefan Krämer, Sebastian Engell, 2018-05-07 This monograph provides foundations methods guidelines and examples for monitoring and improving resource efficiency during the operation of processing plants and for improving their design The measures taken to improve their energy and resource efficiency are strongly influenced by regulations and standards which are covered in Part I of this book Without changing the actual processing equipment the way how the processes are operated can have a strong influence on the resource efficiency of the plants and this potential can be exploited with much smaller investments than needed for the introduction of new process technologies This aspect is the focus of Part II In Part III we discuss physical changes of the process technology such as heat integration synthesis and realization of optimal processes and industrial symbiosis The last part deals with the people that are needed to make these changes possible and discusses the path towards a resource efficiency culture Written with industrial solutions in mind this text will benefit practitioners as well as the academic community
