Raza,2020-10-16 The novel coronavirus disease 2019 COVID 19 pandemic has posed a major threat to human life and health This book is beneficial for interdisciplinary students researchers and professionals to understand COVID 19 and how computational intelligence can be used for the purpose of surveillance control prevention prediction diagnosis and potential treatment of the disease The book contains different aspects of COVID 19 that includes fundamental knowledge epidemic forecast models surveillance and tracking systems IoT and IoMT based integrated systems for COVID 19 social network analysis systems for COVID 19 radiological images CT X ray based diagnosis system and computational intelligence and in silico drug design and drug repurposing methods against COVID 19 patients The contributing authors of this volume are experts in their fields and they are from various reputed universities and institutions across the world This volume is a valuable and comprehensive resource for computer and data scientists epidemiologists radiologists doctors clinicians pharmaceutical professionals along with graduate and research students of interdisciplinary and multidisciplinary sciences

Plant Microbiome and Biological Control Piyush Mathur,Swarnendu Roy,2025-01-07 This book offers a comprehensive guide to discovering assessing and utilizing consortia of beneficial microbes for crop protection and enhanced crop production in the context of climate change It provides deep insights into the functional roles of the rhizomicrobiome including AMF endophytes PGPRs and the phyllosphere microbiome as well as the microbiomes of different plant parts such as seeds fruits and stems in promoting plant growth development and the biocontrol of pests and pathogens in a sustainable manner The book also presents the latest updates on molecular biology techniques genetic engineering biotechnological tools and metagenomics which are widely used for analyzing plant pathogen interactions and microbial identification It will be especially valuable for students and faculty involved in the study and teaching of plant microbe interactions as well as researchers working on sustainable methods for plant disease management With cutting edge research from leading experts this book aims to contribute to the development of an eco friendly sustainable agricultural system

The Model Legume Medicago truncatula, 2 Volume Set Frans J. de Bruijn,2020-01-29 Fully covers the biology biochemistry genetics and genomics of Medicago truncatula Model plant species are valuable not only because they lead to discoveries in basic biology but also because they provide resources that facilitate translational biology to improve crops of economic importance Plant scientists are drawn to models because of their ease of manipulation simple genome organization rapid life cycles and the availability of multiple genetic and genomic tools This reference provides comprehensive coverage of the Model Legume Medicago truncatula It features review chapters as well as research chapters describing experiments carried out by the authors with clear materials and methods Most of the chapters utilize advanced molecular techniques and biochemical analyses to approach a variety of aspects of the Model The Model Legume Medicago truncatula starts with an examination of M truncatula plant development biosynthesis of natural products stress and M truncatula and the M truncatula Sinorhizobium meliloti symbiosis Symbiosis of Medicago truncatula with arbuscular mycorrhiza comes next followed by

chapters on the common symbiotic signaling pathway CSSP or SYM and infection events in the Rhizobium legume symbiosis Other sections look at hormones and the rhizobial and mycorrhizal symbioses autoregulation of nodule numbers AON in M truncatula Medicago truncatula databases and computer programs and more Contains reviews original research chapters and methods Covers most aspects of the M truncatula Model System including basic biology biochemistry genetics and genomics of this system Offers molecular techniques and advanced biochemical analyses for approaching a variety of aspects of the Model Legume Medicago truncatula Includes introductions by the editor to each section presenting the summary of selected chapters in the section Features an extensive index to facilitate the search for key terms The Model Legume Medicago truncatula is an excellent book for researchers and upper level graduate students in microbial ecology environmental microbiology plant genetics and biochemistry It will also benefit legume biologists plant molecular biologists agrobiologists plant breeders bioinformaticians and evolutionary biologists

Lead Generation, 2 Volume Set Jörg Holenz, 2016-06-27 In this comprehensive two volume resource on the topic senior lead generation medicinal chemists present a coherent view of the current methods and strategies in industrial and academic lead generation This is the first book to combine both standard and innovative approaches in comparable breadth and depth including several recent successful lead generation case studies published here for the first time Beginning with a general discussion of the underlying principles and strategies individual lead generation approaches are described in detail highlighting their strengths and weaknesses along with all relevant bordering disciplines like e g target identification and validation predictive methods molecular recognition or lead quality matrices Novel lead generation approaches for challenging targets like DNA encoded library screening or chemical biology approaches are treated here side by side with established methods as high throughput and affinity screening knowledge or fragment based lead generation and collaborative approaches Within the entire book a very strong focus is given to highlight the application of the presented methods so that the reader will be able to learn from real life examples The final part of the book presents several lead generation case studies taken from different therapeutic fields including diabetes cardiovascular and respiratory diseases neuroscience infection and tropical diseases The result is a prime knowledge resource for medicinal chemists and for every scientist involved in lead generation

Responsible Fisheries in the Marine Ecosystem Michael Sinclair, Grimur Valdimarsson, 2014-05-28 This book addresses ecological and environmental issues associated with responsible and sustainable marine fisheries It includes 22 chapters and has been developed from the Conference on Responsible Fisheries in the Marine Ecosystem held in Iceland in October 2001 Contents include a global overview of marine capture fisheries legal protection for marine ecosystems dynamics of marine ecosystems the role of man in marine ecosystems and incorporating ecosystem considerations in fisheries management The book has a subject index

Lung Cancer and Environmental Toxicants Kamal Dua, Gaurav Gupta, Ronan MacLoughlin, Sachin Kumar Singh, Asif Ahmad Bhat, 2025-05-23 Lung Cancer and Environmental Toxicants aims

to explore the intricate relationship between lung cancer and environmental toxicants shedding light on a hidden link that demands urgent attention This groundbreaking book addresses a critical gap in the current literature by introducing a pioneering exploration of the interplay between lung cancer and environmental toxicants Previous articles have not coalesced into a comprehensive examination of the complex connection between lung cancer development and the diverse array of environmental toxicants This book delves into the latest scientific research and clinical findings to offer a clear way forward for healthcare workers to assess and treat lung cancer patients who may have been exposed to these substances Lung Cancer and Environmental Toxicants provides a precise view of the impact of environmental toxicants on lung cancer covering various aspects including epidemiology molecular mechanisms exposure pathways and preventive measures This unique and timely work will pave the way for a deeper understanding of the underexplored factors contributing to lung cancer incidence offering novel insights into the role of various toxic substances in disease causation This significant title will catalyze new avenues of research and awareness in the fields of oncology environmental health and public policy Unlocks the intricate nexus between lung cancer and environmental toxicants offering an unprecedented exploration of complex mechanisms and interactions for advancing research in oncology and environmental health Takes a global perspective on lung cancer and environmental toxicants considering the prevalence of the disease and its causes in different regions of the world as well as addressing the challenges faced by developing nations Presents rigorous evidence based research on the effects of toxicants on the human lung ensuring the book s indispensability

Transporters as Drug Targets Gerhard F. Ecker, Rasmus P. Clausen, Harald H. Sitte, 2016-12-19 As opposed to other books on the topic this volume is unique in also covering emerging transporter targets Following a general introduction to the importance of targeting transporter proteins with drugs the book systematically presents individual transporter classes and explains their pharmacology and physiology The text covers all transporter families with known or suspected importance as drug targets including neurotransmitter transporters ABC transporters glucose transporters and organic ion transporters The final part discusses recent advances in structural studies of transport proteins assay methods for transport activity and the systems biology of transporters and their regulation With its focus on drug development issues this authoritative overview is required reading for researchers in industry and academia targeting transport proteins for the treatment of disease

[ADARs](#), 2025-01-29 ADARs Volume 710 in this ongoing series highlights new advances in the field with this new volume presenting interesting chapters written by an international board of authors Updates in this new release include Yeast as a discovery tool for hyperactive ADARs X ray crystallography of ADAR RNA complexes Enrichment capture enhances the ability to detect A to I editing Editing specificity of ADAR isoforms Novel chemical tools for detection methods of A to I sites En Masse Evaluation of RNA Guides EMERGe for ADARs Mouse models for defining physiological functions of ADARs Nanopore sequencing to detect A to I editing sites CellREADR An ADAR based RNA sensor and more Additional sections cover Site directed RNA editing with MS2 ADAR

systems Sequencing and Bioinformatic Tools for Accurate Assessment of A to I editing in Complete Transcriptomes Aptazyme directed A to I RNA editing and Obstacles in quantifying A to I editing by Sanger Sequencing Provides the latest information on ADARs research Offers outstanding original reviews on a range of ADARs research topics Serves as an indispensable reference for researchers and students alike Energy Research Abstracts ,1987 **Collecting Plant Genetic Diversity** Luigi Guarino,V. Ramanatha Rao,Robert Reid,1995 Loss of plant diversity a call for action List of acronyms and abbreviations Before setting out In the field Back at base Case studies
