Special Maps of Persia 1477-1925 Cyrus Alai, 2023-01-30 This volume complements the best seller and award winning *General Maps of Persia* praised by Dr John H. Bert, Chief of the Geography and Map Division of the Library of Congress. This carefully researched work is a must have item in any collection of research materials on the history of cartography. I cannot wait for the arrival of subsequent volumes of further great scholarship and readable map reproductions on other detailed aspects of the history of mapping of Persia. Encouraged by numerous commending reviews in five languages (English, French, German, Persian and Armenian) and gratifying testimonials from many renowned authorities in the fields of History of Cartography and Iranian Studies, Cyrus Alai continued his research and collected further material to produce the present volume *Special Maps of Persia 1477-1925* covering every map of that region other than general maps. Thus it not only complements the *General Maps of Persia* it is also a completely new volume in its own right and providing an even closer insight into the region. The book is divided into nine chapters: Historical Maps, District Maps, Frontier Maps, Town Maps, Political Maps etc. Like the preceding volume it has a dual character being both a cartobibliography and a mapping history of Persia. It contains 761 map entries of which 409 are illustrated, mostly in colour. Concise related historical accounts precede every chapter and section and essential historical notes are also supplied within many of the map entries. Undoubtedly this book is a treasure house not just for cartographers but also historians, social historians, linguists and archaeologists.

Iraq, Second Edition Heather Lehr Wagner, 2009 From the dawn of Western Civilization to the present day, events in Iraq have been at the center of world change. Iraq lies in the heart of the Middle East and is central to this important region in countless ways. The domestication of many plants and animals first began here. The world's first urban settlements and civilization were established along the Tigris and Euphrates rivers in what was then known as Mesopotamia. The hanging gardens of Babylon, one of the original Seven Wonders of the World, added to the fame of this historic center of Arab and Islamic art, architecture, science and power. Modern Iraq remains an important Arab heartland but it is also a

troubled land Religious and ethnic strife threaten the country's stability Today as a very fragile democracy is beginning to take root in Iraq much of the future of the Middle East depends upon this country's success Possessed by the Right Hand Bernard K.
