Viswanathan, 2020-12-28 The world of banking is complicated and is replete with terminology seemingly beyond laymen. Banking jargon such as intermediation and fractional banking system seem truly complex and intimidating. The idea of this book is to break through some core banking concepts, simplify them, and make it easier for everyone to understand. Banking concepts are explained through a series of conversations between different characters in this book. Such situation-linked stories make it easy and interesting to learn, understand, and relate. Our main character of this book, Chatur, comes into the world of banking with hardly any knowledge or background. But he weaves his way through the banking world and eventually becomes the CEO of Bachat Bank.

Foods and diets of communities involved in inland aquaculture in Malaita Province, Solomon Islands Jones, C.[Author]; Schwarz, A.M.[Author]; Sulu, R.[Author]; Tikai, P.[Author], Solomon Islands has a population of just over half a million people, most of whom are rural-based subsistence farmers and fishers who rely heavily on fish as their main animal source food and for income. The nation is one of the Pacific Island Countries and Territories. Future shortfalls in fish production are projected to be serious, and government policy identifies inland aquaculture development as one of the options to meet future demand for fish. In Solomon Islands, inland aquaculture has also been identified as a way to improve food and nutrition security for people with poor access to marine fish. This report, undertaken by a WorldFish study under the CGIAR Research Program on Aquatic Agricultural Systems, explores the potential role of land-based aquaculture of Mozambique tilapia in Solomon Islands as it relates to household food and nutrition security. This nutrition survey aimed to benchmark the foods and diets of households newly involved in small homestead tilapia ponds and their neighboring households in the central region of Malaita, the most populous island of all the provinces in Solomon Islands. Focus group discussions and semistructured interviews were employed in 10 communities: five inland and five coastal, four clinics and five schools.
