The Will To Create Astrida Orle Tantillo,2012-01-11 Better known as a poet and dramatist Johann Wolfgang von Goethe 1749 1832 was also a learned philosopher and natural scientist Astrida Orle Tantillo offers the first comprehensive analysis of his natural philosophy which she contends is rooted in creativity Tantillo analyzes Goethe s main scientific texts including his work on physics botany comparative anatomy and meteorology She critically examines his attempts to challenge the basic tenets of Newtonian and Cartesian science and to found a new natural philosophy In individual chapters devoted to different key principles she reveals how this natural philosophy which questions rationalism the quantitative approach to scientific inquiry strict gender categories and the possibility of scientific objectivity illuminates Goethe s standing as both a precursor and critic of modernity Tantillo does not presuppose prior knowledge of Goethe or science and carefully avoids an overreliance on specialized jargon This makes *The Will to Create* accessible to a wide audience including philosophers historians of science and literary theorists as well as general readers

On the Literature

and Thought of the German Classical Era Hugh Barr Nisbet, 2021-05-20 This volume provides a valuable contribution to our knowledge of eighteenth and nineteenth century intellectual life inside and outside Germany Prof Karl S Guthke Harvard University This elegant collection of essays ranges across eighteenth and nineteenth century thought covering philosophy science literature and religion in the Age of Goethe A recognised authority in the field Nisbet grapples with the major voices of the Enlightenment and gives pride of place to the figures of Lessing Herder Goethe and Schiller These eleven essays range widely in their compass of thought and intellectual discourse dealing incisively with themes including the philosophical implications of literature and the relationship between religion science and politics The result is an accomplished reflection on German thought but also on its rebirth as Nisbet argues for the relevance of these Enlightenment thinkers for the readers of today The first half of this collection focuses predominantly on eighteenth century thought where names like Lessing Goethe and Herder but also Locke and Voltaire feature The second has a wider chronological scope discussing authors such as Winckelmann and Schiller while branching out from discussions of religion philosophy and literature to explore the sciences Issues of biology early environmentalism and natural history also form part of this volume The collection concludes with an examination of changing attitudes towards art in the aftermath of the Age of Goethe The essays in this volume have been previously published separately but are brought together in this collection to present Nisbet's widely acclaimed perspectives on this fascinating period of German thought It will be of interest to scholars and students of the intellectual life of Europe during the Enlightenment while its engaging and lucid style will also appeal to the general reader 100
