

PRESS RELEASE

ANNA NICOLE SMITH 39 year old

February 9, 2007

Anna Nicole Smith was found unresponsive in her room at the Seminole Hard Rock Hotel on February 8, 2007, sometime after 1:00 pm. According to the information received, Ms Smith was sick with symptoms of stomach flu for several days prior. The Seminole Police Department was notified at about 1:45 of the event. CPR was done by one of her body guards. The patient was treated by paramedics and transported to Hollywood Memorial Hospital where she was declared deceased at 2:45 pm.

The Medical Examiner's Office was notified and assumed jurisdiction over the deceased according to Florida Statutes because of sudden, unexpected and unexplained death.

A complete autopsy was performed on February 9, 2007 by Dr. Joshua A. Perper, Chief Medical Examiner and Dr. Gertrude Juste, Associate Medical Examiner. The autopsy excluded the possibility that physical trauma (such as firearm trauma, sharp weapon injuries, blunt force trauma, or mechanical asphyxia) contributed to or hastened the death. A minor bruise on the left upper back was most likely related to a reported fall in the bathroom several days ago.

The autopsy revealed a moderately enlarged liver and subtle findings in the heart and gastrointestinal system which will have to be verified microscopically. The stomach contains a small amount of blood consistent with terminal shock.

At this time no determination has been made as to the Cause and Manner of death of Ms Anna Nicole Smith.

Further investigation in process in this matter includes:

- Extensive review of past medical records.
- Interview with witnesses that accompanied Ms Anna Nicole Smith to Florida and/or witnessed her condition and terminal collapse.
- Further cardiovascular and neuropathological examination of heart, brain and spinal cord.
- Bacterial and viral cultures of heart, lung, cerebro-spinal fluid and other body fluids.
- Chemical analysis of eye fluid.
- Extensive microscopic examination of sampled body tissues.

It is estimated that the results of the multiple tests and the integration of the clinical pathological and laboratory data will take several weeks (3-5).

In view of the significant public interest in this unfortunate death, the Medical Examiner's Office will make optimal efforts to expedite the determination of Cause and Manner of death without affecting the thoroughness and reliability of the investigation.
