(Honeysuckle)(Chapter - 1) (Who did Patrick's Homework?)  
(Class - VI)

## Working with the Text

Answer the following questions. (Refer to that part of the text whose number is given against the question. This applies to the comprehension questions throughout the book.)

### Question 1:

What did Patrick think his cat was playing with? What was it really?

#### Answer 1:

Patrick thought that his cat was playing with a little doll. But in reality, it was a very small sized man, an elf.

### Question 2:

Why did the little man grant Patrick a wish?

#### Answer 2:

The little man granted Patrick a wish as Patrick had saved his life from the cat.

### Question 3:

What was Patrick's wish?

#### Answer 3:

Patrick hated doing homework. So he made a wish that the little man should do all his homework till the end of the session.

### Question 4:

In what subjects did the little man need help, to do Patrick's homework?

#### Answer 4:

The little man was weak in Maths, English and History. So, he needed Patrick's help in these subjects.

### Question 5:

How did Patrick help him?

#### Answer 5:

Patrick sat beside the little man and guided him to do homework. Moreover, he brought books from library and read out to him.

### Question 6:

Who do you think did Patrick's homework — the little man, or Patrick himself? Give reasons for your answer.

#### Answer 6:

It was Patrick himself who actually did all the homework. Because he had to assist the elf again and again with guidance and books.

## Answer Question Chapter 6:

**Self and Identity** Trenton Merricks, 2022 Trenton Merricks shows that we cannot get clear about personal identity unless we bring together the ethics and the metaphysics He argues that while identity is not what matters in survival it delivers what matters in survival which is the appropriateness of first personal anticipation of and self interested concern for a future person

The Process of Question Answering Wendy G. Lehnert, 2022-11-01 Originally published in 1978 The Process of Question Answering examines a phenomenon that relies on many realms of human cognition language comprehension memory retrieval and language generation Problems in computational question answering assume a new perspective when question answering is viewed as a problem in natural language processing A theory of human question answering must necessarily entail a theory of human memory organization and theories of the cognitive processes that access and manipulate information in memory This book describes question answering as a particular task in information processing The theoretical models described here have been built on a formulation of general theories in natural language processing theories about language that were developed without the specific problem of question answering in mind By requiring programmers to be concerned with the precise form of information in memory and the precise operations manipulating that information they can uncover significant problems that would otherwise be overlooked An early insight into artificial intelligence today this reissue can be enjoyed in its historical context
