## Question 1:

Define the term 'tissue'?

### Answer 1:

The group of cells similar in structure that work together to achieve a particular function forms a tissue. This group of cells has a common origin.

## Question 2:

How many types of elements together make up the xylem tissue? Name them.

### Answer 2:

Xylem is a complex tissue. It is made up of following four kinds of cells or elements:

- Tracheids
- Vessels
- Xylem parenchyma
- Xylem fibres.

## Question 3:

How are simple tissues different from complex tissues in plants?

### Answer 3:

**Simple tissues** are made up of one type of cells which coordinate to perform a common function.

**Complex tissues** are made up of more than one type of cells. All these coordinate to perform a common function.

## Question 4:

Differentiate between parenchyma, collenchyma and sclerenchyma on the basis of their cell wall.

### Answer 4:

The differences between cell walls of parenchyma, collenchyma and sclerenchyma are given in the following table:

| Parenchyma                                                                    | Collenchyma                                                                                       | Sclerenchyma                                                                       |
|-------------------------------------------------------------------------------|---------------------------------------------------------------------------------------------------|------------------------------------------------------------------------------------|
