

Speech Therapy Report

Name: **Haya Al Yasin**
DOB: **09.06.03**

To whom it may concern,

General Review:

Haya is 3 years and 5 months old. She has a global developmental delay as a residual symptom of the pilocytic astrocytoma. Her medical history was described in details in the previous report dated 05.05.06.

Haya had 28 sessions before the summer vacation and 27 sessions since Sept-06. The activities are done by presenting familiar objects, initiating her to imitate sounds and eventually gestures, encouraging her to look at pictures, etc... These means are used to develop her:

- Attention skills
- Receptive language skills
- Oral motor skills
- Expressive language skills

Current Level:

Haya is more receptive than before. She has good attendance during the sessions that last around 45 min each.

Attention skills:

Haya has shown a noticeable progress in this area. At present, she responds reflexively to sounds, she notices faces of others, she maintains eye contact with the speaker, she responds with a smile to a friendly speech, she attends to the speaker's mouth and she tries to imitate lips movements especially when she hears a familiar nursery rhyme, and she also sustains her attention in looking at toys or objects.

Receptive language skills:

Due to the fact that Haya is more interactive and cooperative than before, she seemed to have her receptive skills developed. Actually, Haya can localize the speaker, she follows few simple directions that require body movements such as "lay down" or "come to me", she recognizes her own name, she looks with interest at objects, and she reacts differently when someone is talking to her in a happy or mad tone. However, it's still hard to evaluate whether Haya understands "No" or identifies objects when named (looking at the named object or trying to reach it).

Oral motor skills:

No changes occurred in this area in spite of the blowing movement that she started to do while making soap bubbles.

And Language Therapy Report:

Assessment in Speech and Language Therapy John R. Beech, Leonora Harding, 2018-10-31 What assessment tests are available to speech therapists How are they best used Originally published in 1993 Assessment in Speech and Language Therapy was designed to guide speech therapists in choosing the most appropriate assessments for evaluation monitoring and intervention at the time By providing guidance on defining the issues in assessment it shows how to make sure that the process will produce a result relevant to the therapist's own needs and those of his or her clients The major issues involved are discussed in detail in particular how to make sure that assessments are relevant to individual needs This title will be invaluable to all speech therapists and clinical psychologists working in this area

Assessment in Speech and Language Therapy John R. Beech, Leonora Harding, Diana Hilton-Jones, 1993 Assessments in Speech Therapy is designed to guide speech therapists in choosing the most appropriate assessments for evaluation monitoring and intervention By providing guidance on defining the issues in assessment it shows how to make sure that the process will produce a result relevant to the therapist's own needs and those of his or her clients
