Bishop, 2013-07-03 The 4th edition of the Handbook of Research on Educational Communications and Technology expands upon the previous 3 versions providing a comprehensive update on research pertaining to new and emerging educational technologies Chapters that are no longer pertinent have been eliminated in this edition with most chapters being completely rewritten expanded and updated Additionally new chapters pertaining to research methodologies in educational technology have been added due to expressed reader interest Each chapter now contains an extensive literature review documenting and explaining the most recent outstanding research including major findings and methodologies employed The Handbook authors continue to be international leaders in their respective fields the list is cross disciplinary by design and great effort was taken to invite authors outside of the traditional instructional design and technology community

Learning from Dynamic Visualization Richard Lowe, Rolf Ploetzner, 2017-05-18 This volume tackles issues arising from today s high reliance on learning from visualizations in general and dynamic visualizations in particular at all levels of education It reflects recent changes in educational practice through which text no longer occupies its traditionally dominant role as the prime means of presenting to be learned information to learners Specifically the book targets the dynamic visual components of multimedia educational resources and singles out how they can influence learning in their own right It aims to help bridge the increasing gap between pervasive adoption of dynamic visualizations in educational practice and our limited understanding of the role that these representations can play in learning The volume has recruited international leaders in the field to provide diverse perspectives on the dynamic visualizations and learning It is the first comprehensive book on the topic that brings together contributions from both renowned researchers and expert practitioners Rather than aiming to present a broad general overview of the field it focuses on innovative work that is at the cutting edge As well as further

developing and complementing existing approaches the contributions emphasize fresh ideas that may challenge existing orthodoxies and point towards future directions for the field They seek to stimulate further new developments in the design and use of dynamic visualizations for learning as well as the rigorous systematic investigation of their educational effectiveness the volume sheds light on the complex and highly demanding processes of conceptualizing developing implementing dynamic visualizations in practice as well challenges relating research application perspectives
