Index of Specifications and Standards, 1967 *Power Management for Wearable Electronic Devices* Dima Kilani, Baker Mohammad, Mohammad Alhawari, Hani Saleh, Mohammed Ismail, 2020-01-17 This book describes power management integrated circuits PMIC for power converters and voltage regulators necessary for energy efficient and small form factor systems The authors discuss state of the art PMICs not only for battery powered wearable devices but also energy harvesting based devices The circuits presented support voltage scaling to reduce the overall average power consumption of a wearable device resulting in longer device operating time The discussion includes many designs control techniques and approaches to distribute efficiently the power among different blocks in the device Demonstrates for readers how to innovate in designing power management integrated circuits PMIC suitable for wearable devices powered by either battery or harvesting energy Introduces a dual outputs switched capacitor using a single voltage regulator to minimize the area overhead and discusses the effect of having more than two outputs on the area and power efficiency Introduces a novel clock less digital LDO regulator that eliminates the use of the clocked comparator and serial shift register in the conventional design Presents experimental results of energy harvesting based power management units PMU using different combinations of power converters and voltage regulators providing a guide for designers to select the appropriate option based on device requirements *Advanced Control Methodologies For Power Converter Systems* Wensheng Luo, Yunfei Yin, Xiangyu Shao, Jianxing Liu, Ligang Wu, 2022-02-16 This book aims to present some advanced control methodologies for power converters Power electronic converters have become indispensable devices for plenty of industrial applications over the last decades Composed by controllable power switches they can be controlled by effective strategies to achieve desirable transient response and steady state performance to ensure the stability reliability and safety of the system The most popular control strategy of power converters is the linear proportional integral derivative series control which is adopted as industry standard However when there exist parameter changes nonlinearities and load disturbances in the system the performance of the controller will be significantly degraded To overcome this problem many advanced control methodologies and techniques have been developed to improve the converter performance This book presents the research work on some advanced control methodologies for several types of power converters including three phase two level AC DC power converter three phase NPC AC DC power converter and DC DC buck converter The effectiveness and advantage of the proposed control strategies are verified via simulations and experiments The content of this book can be divided into two parts The first part focuses on disturbance observer based control methods for power converters under investigation The second part investigates intelligent control methods These methodologies provide a framework for controller design observer design stability and performance analysis for the considered power converter systems **Laser Inter-Satellite Links Technology** Jianjun Zhang, Jing Li, 2023-01-05 LASER INTER SATELLITE LINKS TECHNOLOGY State of the art resource

covering key technologies and related theories of inter satellite links Laser Inter Satellite Links Technology explores satellite networking as a growing topic in the field of communication technology introducing the definition types and working frequency bands of inter satellite links discussing the number of orbital elements of the spacecraft motion state under two body motion and their conversion relationship and establishing the basic demand model for inter satellite link network chain topology model and transmission protocol model The book focuses on the analysis and introduction of the principles and error sources of microwave and laser inter satellite ranging including the basic composition workflow and constraints of the laser inter satellite link and related design principles of the inter satellite laser transmitter and receivers Later chapters also discuss theories and methods of acquisition alignment and tracking the impact of alignment errors on performance and inter satellite link modulation and its implementation Specific sample topics covered in Laser Inter Satellite Links Technology include Pulse position modulation PPM differential pulse position modulation DPPM digital pulse interval modulation DPIM and double head pulse interval modulation DH PIM Basic demand model of inter satellite link network application including basic configuration of constellations and inter satellite transmission networks Inter satellite ranging accuracy principles of microwave inter satellite ranging and analysis of microwave ranging error sources Effect of tracking error on the beam distribution at the receiving end and influence of tracking and pointing error on communication error rate Laser Inter Satellite Links Technology serves a completely comprehensive resource on the subject and is a must have reference for experts and scholars in aerospace along with graduates and senior undergraduates in related programs of study

Advanced Electric Drive Vehicles Ali Emadi, 2014-10-24 Electrification is an evolving paradigm shift in the transportation industry toward more efficient higher performance safer smarter and more reliable vehicles There is in fact a clear trend to move from internal combustion engines ICEs to more integrated electrified powertrains Providing a detailed overview of this growing area Advanced Electric Drive Vehicles begins with an introduction to the automotive industry an explanation of the need for electrification and a presentation of the fundamentals of conventional vehicles and ICEs It then proceeds to address the major components of electrified vehicles i e power electronic converters electric machines electric motor controllers and energy storage systems This comprehensive work Covers more electric vehicles MEVs hybrid electric vehicles HEVs plug in hybrid electric vehicles PHEVs range extended electric vehicles REEVs and all electric vehicles EVs including battery electric vehicles BEVs and fuel cell vehicles FCVs Describes the electrification technologies applied to nonpropulsion loads such as power steering and air conditioning systems Discusses hybrid battery ultra capacitor energy storage systems as well as 48 V

electrification and belt driven starter generator systems Considers vehicle to grid V2G interface and electrical infrastructure issues energy management and optimization in advanced electric drive vehicles Contains numerous illustrations practical examples case studies and challenging questions and problems throughout to ensure a solid understanding of key concepts and applications Advanced Electric Drive Vehicles makes an ideal textbook for senior level undergraduate or graduate engineering courses and a user friendly reference for researchers engineers managers and other professionals interested in transportation electrification

Smart Technologies in Urban Engineering Olga Arsenyeva,Tetyana Romanova,Maria Sukhonos,Ihor Biletskyi,Yevgen Tsegelnyk,2023-12-18 This book offers a comprehensive review of smart technologies and provides perspectives on their applications in urban engineering It covers a wide range of applications from manufacturing engineering and transport logistics to information and computation technologies providing readers with fresh ideas for future research and collaborations The book showcases selected papers from the International Conference on Smart Technologies in Urban Engineering STUE 2023 hosted by O M Beketov National University of Urban Economy in Kharkiv Ukraine The conference held on June 8 10 2023 aimed to address the complex rehabilitation of areas damaged by military conflicts and natural disasters The contributions within this book offer a wealth of valuable information fostering a meaningful exchange of experiences among scientists in the field of urban engineering By delving into this book readers explore innovative approaches to tackle urban challenges gain insights from experts and contribute to the advancement of smart technologies for the betterment of cities worldwide

Advances in Smart Grid and Renewable Energy Sabyasachi SenGupta,Ahmed F. Zobaa,Karma Sonam Sherpa,Akash Kumar Bhoi,2017-10-25 This volume comprises select proceedings of ETAEERE 2016 The volume offers state of the art chapters on energy management systems EMS renewable energy resources micro generation green communications architectures and frameworks green computing and education as well as energy aware process optimization The contents covers a wide variety of topics and aspects including management of renewable energy systems and environmental challenges The contents of this volume will be useful to researchers and practicing engineers working in the areas of smart grids and renewable energy generation distribution and management
