Organizational Resilience D. Christopher Kayes, 2015 In the age of knowledge organizations survive and thrive only when they learn All too often when organizations are confronted with novel or changing situations the process of learning breaks down and the result is catastrophic In *Organizational Resilience How Learning Sustains Organizations in Crisis* Disaster and Breakdown D Christopher Kayes explains why all organizational leaders should be concerned about learning and the dire consequences that may ensue if they are not Kayes draws on the foundational ideas of philosopher John Dewey then connects this philosophy to contemporary studies on learning management and organizations Through a wide range of examples from the realms of government finance engineering healthcare and commercial air travel he describes how learning can help organizations weather crises and outlines specific ways that leaders can learn from their experience The first comprehensive review of how learning sustains organizations in challenging times *Organizational Resilience* is essential reading for crisis managers disaster recovery team leaders continuity of operations planning professionals emergency management professionals and leaders at all levels who want their organizations to thrive **Pandora's Box** Geoffrey Newton, 2023-05-05 This book is about the coronavirus and the pandemic it spawned and what this outbreak means for future pandemics It analyses the official response and sees where improvements can be made for example the World Health Organization waited till March to designate the coronavirus a pandemic and a full year before confirming its airborne transmission The book looks at the specific nature of the virus its origins and how it was transmitted why it was so deadly to predisposed individuals how it compares to previous pandemics what measures were taken mitigate the disease and how to protect ourselves against it in future The book also looks into the wider implications of the pandemic and its causes for example how climate change and biodiversity are coming into direct conflict with ever expanding needs of population growth and urban sprawl has conspired to bring us into ever closer contact with these viruses for example Nipah virus outbreak from the deforestation of the Indonesian Rain Forest and Ebola from settlement expansion in the Congo Lastly the book looks at the wider nature of viruses and their historical significance to the tree of life of the planet and their relationship to our evolution This book is a timely search into the nature of viruses and how they will affect us going forward and what measures we can take to protect ourselves and mitigate the dangers from future outbreaks by integrating our industrial society into an

ecological friendly setting thereby accommodating these viruses *Advances in Aerospace Guidance, Navigation and Control* Bogusław Dołęga, Robert Głębocki, Damian Kordos, Marcin Żugaj, 2017-12-15 The first three CEAS Council of European Aerospace Societies Specialist Conferences on Guidance Navigation and Control CEAS EuroGNC were held in Munich Germany in 2011 in Delft Netherlands in 2013 and in Toulouse France in 2017 The Warsaw University of Technology WUT and the Rzeszow University of Technology RzUT accepted the challenge of jointly organizing the 4th edition The conference aims to promote scientific and technical excellence in the fields of Guidance Navigation and Control GNC in aerospace and other fields of technology The Conference joins together the industry with the academia research This book covers four main topics Guidance and Control Control Theory Application Navigation UAV Control and Dynamic The papers included focus on the most advanced and actual topics in guidance navigation and control research areas Control theory analysis and design Novel navigation estimation and tracking methods Aircraft spacecraft missile and UAV guidance navigation and control Flight testing and experimental results Intelligent control in aerospace applications Aerospace robotics and unmanned autonomous systems Sensor systems for guidance navigation and control Guidance navigation and control concepts in air traffic control systems For the 4th CEAS Specialist Conference on Guidance Navigation and Control the International Technical Committee established a formal review process Each paper was reviewed in compliance with good journal practices by independent and anonymous reviewers At the end of the review process papers were selected for publication in this book **Managing Risk** Romney Beecher Duffey, John Walton Saull, 2008-09-15 The human element is the principle cause of incidents and accidents in all technology industries hence it is evident that an understanding of the interaction between humans and technology is crucial to the effective management of risk Despite this no tested model that explicitly and quantitatively includes the human element in risk prediction is currently available Managing Risk the Human Element combines descriptive and explanatory text with theoretical and mathematical analysis offering important new concepts that can be used to improve the management of risk trend analysis and prediction and hence affect the accident rate in technological industries It uses examples of major accidents to identify common causal factors or echoes and argues that the use of specific experience parameters for each particular industry is vital to achieving a minimum error rate as defined by mathematical prediction New ideas for the perception calculation and prediction of risk are introduced and safety management is covered in depth including for rare events and unknown outcomes Discusses applications to multiple industries including nuclear aviation medical shipping chemical industrial railway offshore oil and gas Shows consistency between learning for large systems and technologies with the psychological models of learning from error correction at the personal level Offers the expertise of key leading industry figures involved in safety work in the civil aviation and nuclear engineering industries Incorporates numerous fascinating case studies of key technological accidents Managing Risk the Human Element is an essential read for professional safety experts human reliability experts and engineers in all

technological industries as well as risk analysts corporate managers and statistical analysts It is also of interest to professors researchers and postgraduate students of reliability and safety engineering and to experts in human performance congratulations on what appears to be at a high level of review a significant contribution to the literature I have found much to be admired in your research Mr Joseph Fragola Vice President of Valador Inc The book is not only technically informative but also attractive to all concerned readers and easy to be comprehended at various level of educational background It is truly an excellent book ever written for the safety risk managers and analysis professionals in the engineering community especially in the high reliability organizations Dr Feng Hsu Head of Risk Assessment and Management NASA Goddard Space Flight Center I admire your courage in confronting your theoretical ideas with such diverse ecologically valid data and your success in capturing a major trend in them I should add that I find all this quite inspiring The idea that you need to find the right measure of accumulated experience and not just routinely used calendar time makes so much sense that it comes as a shock to realize that this is a new idea Professor Stellan Ohlsson Professor of Psychology University of Illinois at Chicago
