B-Turbojet engine after burner

An **afterburner** is an additional component added to some jet engines, primarily those on military aircraft. The Jumo 004 engine variation, **004C**, included an afterburner for increased thrust in the design, but was never built. It was also considered for the Miles M.52 project during the last years of World War II (never completed nor tested) where it was called a **reheat jet pipe**. The first operational aircraft with afterburner was the Swedish SAAB J29 "Flying Barrel" in 1954; this was also the first aircraft to enter service with a swept wing configuration. For some years it held speed records due to its very advanced technology, adopted for the first time.
