Aircraft Valuation Guide:

Aircraft Valuation in Volatile Market Conditions Bijan Vasigh, Farshid Azadian, 2022-03-15 This book provides indispensable knowledge for practitioners in aircraft financing. It presents an innovative framework that treats valuation analysis as a systematic effort in problem solving directed at rational financial decision making. It incorporates much of the modern approach to financial investment decision making. It proposes essential tools of flexibility, adaptability, and commonality of aircraft financial analyses that apply to an almost infinite variety of valuation problem situations. Once these connections have been introduced, the reader will be equipped with an understanding of the underlying concepts of aircraft valuation processes and techniques and the subsequent financing alternatives available to fund aircraft assets. This is an essential book for airline professionals, aircraft leasing companies, consultants, bankers, government officials, and students of aircraft finance. It is an approachable resource for those without a formal background in finance. [Aircraft Leasing and Financing](#)

Vitaly Guzhva, Sunder Raghavan, Damon J. D'Agostino, 2024-06-21 Aircraft Financing and Leasing Tools for Success in Aircraft Acquisition and Management Second Edition provides students and industry professionals with unique insights into the latest developments in the Commercial Aircraft and Engine Leasing and Financing industry that has grown into one of the most distinctive and important industries globally. This book offers a blend of academic and professional views that make it educational and relevant to the everyday operations of the industry. It can be used as a stand alone textbook as well as a practitioner's guide. Given the impact of the COVID 19 virus on airlines around the world, the industry has experienced substantial changes since the first edition was published. This second edition is thoroughly revised and includes some new case studies and an entirely new chapter on Environmental Considerations with Respect to Aviation Finance. Aircraft Financing and Leasing details the industry's foundational concepts including aviation law and regulation, airline credit analysis, maintenance reserve development, insurance, transaction cost modeling, risk management tools such as asset and credit diversification, and the art of lease negotiations. Different types of aircraft are explored, highlighting their purposes as well as when and why airline operators and investors choose specific models over others. In addition, the book covers important factors such as modeling financial returns for leased aircraft and appraising aircraft values. Users will find this an ideal resource for practitioners or as an outstanding reference for senior undergraduate and graduate students. Includes a new chapter on Environmental Considerations with Respect to Aviation Finance as well as updates throughout to reflect changes in the industry, particularly due to COVID 19. Utilizes case studies in each chapter, real life examples that will help the readers apply newly learned concepts to real problems of the industry. Highly illustrated with text boxes for examples and real world applications, graphs, charts, tables, diagrams, flow charts, photos, maps, and examples of forms. Offers a blend of academic and professional views, making it suitable for both student and practitioner. Serves as an aircraft finance and leasing reference for those starting their careers as well as for legal, investment, and other professionals. [Aircraft Finance](#)
