

- 10) Choose one of the other substances from the menu on the right.
Experiment by adding and removing heat to the particles.
Draw and describe the substance in the table below.

Substance Chosen:

Neon

	Solid	Liquid	Gas
Diagram of the particles			
Description of particles (speed, movement, bouncing, etc.)	Slow, orderly, and close together. Very little movement. Only vibrating slightly.	Particles begin moving more and spreading out in the container. Higher energy.	Extremely high energy. Particles are spread out and bouncing all over the container.

- 10) Are particles in the solid state still moving? If so, how would you describe that movement?

Particles in the solid state are still moving, but only very slightly. The movement appears more like a vibration.

- 11) What happens to the behavior gas particles when more and more heat is added?

As more heat is added to particles in the gas state, their movement becomes more disorderly and energetic. They bounce even more quickly against the container.

- 12) What is the most notable difference between particles in the solid phase and the liquid phase?

Particles in the liquid phase contain more energy from heat. This causes the particles to spread out more and spin more quickly than particles in the solid state.

Atchison, Tiffany A. Wild, 2018-05-16. *Towards Inclusion of All Learners through Science Teacher Education* serves as an indispensable resource for teachers and teacher educators wishing to understand how to educate students with exceptionalities in science. This book begins with the voices and stories of the experts: current and former K-12 students with disabilities sharing their experiences in science education classrooms. The voices of students with disabilities are then connected to the work of leading experts in the area of science education for individuals with disabilities in an effort to address the goals of national reform documents by ensuring rigorous science experiences for all students. It is written in a highly accessible and practical manner, making it ideal for all educators, including pre-service and in-service teachers, teacher educators, researchers, and curriculum developers. *Arguing From Evidence in Middle School Science* Jonathan Osborne, Brian M. Donovan, J. Bryan Henderson, Anna C. MacPherson, Andrew Wild, 2016-08-30. *Teaching your students to think like scientists* starts here. Use this straightforward, easy-to-follow guide to give your students the scientific practice of critical thinking today. Science standards require ready-to-implement strategies and activities that help you effortlessly engage students in arguments about competing data sets, opposing scientific ideas, applying evidence to support specific claims, and more. Use these 24 activities drawn from the physical sciences, life sciences, and earth and space sciences to engage students in 8 NGSS science and engineering practices. Establish rich, productive classroom discourse. Extend and employ argumentation and modeling strategies. Clarify the difference between argumentation and explanation. Stanford University professor Jonathan Osborne, co-author of *The National Resource Council's A Framework for K-12 Science Education*, the basis for the Next Generation Science Standards, brings together a prominent author team that includes Brian M. Donovan, Biological Sciences Curriculum Study; J. Bryan Henderson, Arizona State University; Tempe; Anna C. MacPherson, American Museum of Natural History; and Andrew Wild, Stanford University. Student in this new accessible book to help you teach your middle school students to think and argue like scientists. **Technology and Innovation in Learning, Teaching and Education** Meni Tsitouridou, José A.
