Accept any seven of the following answers:

| UNSAFE SITUATION                                                                  | POSSIBLE INJURY                                                                                        |
|-----------------------------------------------------------------------------------|--------------------------------------------------------------------------------------------------------|
| heating a test tube without wearing safety goggles                                | eye damage caused by broken glass if test tube shatters or acid or base burns if liquid boils suddenly |
| not tying back long hair while using a Bunsen burner                              | burns caused by hair catching on fire                                                                  |
| eating and drinking in the lab while dissecting a specimen                        | ingestion of harmful substances caused by contamination of food                                        |
| drinking unknown chemicals from a beaker                                          | ingestion of harmful substances                                                                        |
| washing an electrical equipment with water                                        | electrocution the next time the electrical equipment is plugged into the wall                          |
| horseplay or fooling around in the lab                                            | head or other injuries                                                                                 |
| spills on the floor                                                               | head or other injuries from slipping and falling                                                       |
| working in a crowded work area, starting a lab without clearing off the work area | spillage, causing acid burns or falls                                                                  |
| chemical spill on the table                                                       | acid burn if spill is corrosive                                                                        |
| working with broken glassware                                                     | getting a cut                                                                                          |
| pouring acid into a test tube without using a test tube rack                      | acid burn                                                                                              |

##### Comprehension

###### Safety do's and don'ts

###### Page 5

1. Unsafe practice: improper way of smelling sample  
Correct thing to do: hold the beaker at arm's length and waft the fumes toward the nose
2. Unsafe practice: not taking immediate action  
Correct thing to do: tell partner to stop, drop, and roll; inform the teacher; use the fire blanket
3. Unsafe practice: pouring chemical back into the original container  
Correct thing to do: dispose of the chemical as instructed by your teacher
4. Unsafe practice: spill on the floor; someone could slip and fall  
Correct thing to do: clean up the spill immediately
5. Unsafe practice: not listening to instructions  
Correct thing to do: listen to the teacher's instructions; ask the teacher if you are unclear as to what you should be doing
6. Unsafe practice: using a chemical that is not clearly labelled; do not know for sure what chemical you are using  
Correct thing to do: only use chemicals in clearly marked containers

##### Applying Knowledge

###### What is WHMIS?

###### Page 6

1. Corrosive material: will corrode substances with which it comes in contact, including human flesh
2. Dangerously reactive material: may readily react with other substances to produce harmful effects (bleach is an example)
3. Flammable and combustible material: will readily burst into flames
4. Poisonous and infectious material causing immediate and serious toxic effects: likely to cause illness or death if ingested or spilled on skin
