Sustainable Built Environment and Urban Growth Management Wann-Ming Wey,2020-02-21

Nowadays the sustainable built environment planning in most cities has come to a turning point as the growth in traffic and population has become a serious concern and put tremendous pressure on both the environment and people in these cities. It is therefore important to find new ways or lifestyles such as compact city transit oriented development TOD formulations that are more flexible inclusive and sustainable. Furthermore for the sustainable built environment and urban growth management not only should the growth management principles which include smart growth sustainable growth and inclusive growth be taken into account but innovative smart planning strategies such as mixed use design green transport and new urbanism are also utilized in planning sustainable built environments in order to prevent the urban sprawl development that has occurred.

Delivering Value with BIM Adriana Sanchez, Keith Hampson, Simon Vaux, 2016-03-31

Building Information Modelling BIM is a global phenomenon which is gaining significant momentum across the world. Currently there is little information on how to realise and monitor benefits from implementing BIM across the life cycle of a built environment asset. This book provides a practical and strategic framework to realise value from implementing BIM by adapting Benefit Realisation Management theory. It presents an approach for practitioners aiming to implement BIM across the life cycle of built environment assets including both buildings and infrastructure. Additionally the book features wide ranging information about BIM the challenges of monitoring progress towards benefit goals and the greater context of implementation a set of dictionaries that illustrate how benefits can be achieved what the benefit flows are and the enabling tools and processes that contribute to achieving and maximising them a suite of measures that can serve to monitor progress with examples of how they have been used to measure benefits from BIM real world examples from across the world and life cycle phases that show how these benefits can be achieved and information on international maturity and competency measures to complement the value realisation framework. Including a blend of academic and industry input this book has been developed in close collaborative consultation with industry government and international research organisations and could be used for industry courses on BIM benefits and implementation for asset management or by universities that teach BIM related courses.

Advances in Informatics and Computing in Civil and Construction Engineering Ivan Mutis, Timo Hartmann, 2018-10-08 This proceedings volume chronicles the papers presented at the 35th CIB W78 2018 Conference IT in Design Construction and Management held in Chicago IL USA in October 2018. The theme of the conference focused on fostering encouraging and promoting research and development in the application of integrated information technology IT throughout the life cycle of the design construction and occupancy of buildings and related facilities. The CIB

International Council for Research and Innovation in Building Construction was established in 1953 as an association whose objectives were to stimulate and facilitate international cooperation and information exchange between governmental research institutes in the building and construction sector with an emphasis on those institutes engaged in technical fields of research. The conference brought together more than 200 scholars from 40 countries who presented the innovative concepts and methods featured in this collection of papers.

The Largest Art Brent D. Ryan, 2017-10-27 Why urban design is larger than architecture the foundational qualities of urban design examples and practitioners Urban design in practice is incremental but architects imagine it as scaled up architecture large ready to build pop up cities This paradox of urban design is rarely addressed indeed urban design as a discipline lacks a theoretical foundation In *The Largest Art* Brent Ryan argues that urban design encompasses more than architecture and he provides a foundational theory of urban design beyond the architectural scale In a declaration of independence for urban design Ryan describes urban design as the largest of the building arts with qualities of its own Ryan distinguishes urban design from its sister arts by its pluralism plural scale ranging from an alleyway to a region plural time because it is deeply enmeshed in both history and the present plural property with many owners plural agents with many makers and plural form with a distributed quality that allows it to coexist with diverse elements of the city Ryan looks at three well known urban design projects through the lens of pluralism a Brancusi sculptural ensemble in Romania a Bronx housing project and a formally and spatially diverse grouping of projects in Ljubljana Slovenia He revisits the thought of three plural urbanists working between 1960 and 1980 David Crane Edmund Bacon and Kevin Lynch And he tells three design stories for the future imaginary scenarios of plural urbanism in locations around the world Ryan concludes his manifesto with three signal considerations urban designers must acknowledge eternal change inevitable incompleteness and flexible fidelity Cities are ceaselessly active perpetually changing It is the urban designer's task to make art with aesthetic qualities that can survive perpetual change

Getting to Grips with BIM James Harty, Tahar Kouider, Graham Paterson, 2015-12-14 With the UK government's 2016 BIM threshold approaching support for small organisations on interpreting filtering and applying BIM protocols and standards is urgently required Many small UK construction industry supply chain firms are uncertain about what Level 2 BIM involves and are unsure about taking first steps towards having BIM capability As digitisation increasingly impacts on work practices Getting to Grips with BIM offers an insight into an industry in change supplemented by practical guidance on managing the transition towards more widespread and integrated use of digital tools to manage the design construction and whole life use of buildings

Comparison of energy efficient and green buildings Shrestha, Shritu, 2016-04-18 The adverse environmental impacts from inefficient building construction increase if measures to reduce energy and resource use through stringent building policies and efficient technology are not implemented in developed and developing countries To illustrate a holistic approach to reducing buildings energy and resources the comparison of energy efficient and green buildings in terms of their technological aspects and their policy context in developed and developing countries mainly in Europe the USA and India is presented together with a policy package recommendation for Nepal A quality review of multiple literature sources supported by various expert opinions were the methods used for this in depth analysis It discusses that mandatory building standards voluntary labels information instruments and financial incentives are the most effective combination for the shift towards market transformation that results in a higher share of energy efficient and green buildings The lesson such as higher compliance with and enforcement of building energy standards can be seen in developed countries e g Germany Looking at a building's life cycle perspective it is not sufficient to focus solely on operational energy reduction in higher energy efficient buildings as this is achieved by the increased use of energy intensive materials Green requirements must be considered in updating building energy standards and labels particularly for developed countries Green building certification will also become more effective when the stringency of energy standards is higher and when the whole building life cycle assessment is considered Due to the increasing scarcity of energy and resources many developing countries are forced to face up to the need for holistic green buildings Although baseline standards are not as high as in most developed countries and national financial support is low the gradual move towards making the standards more stringent and incorporating the wider scope of resource saving are positive developments in developing countries e g India However to achieve significant success strategies must include the establishment of a suitable funding environment a political commitment and a strong government vision for long term and sustainable building

construction The challenges faced by Nepal are even greater due to the fast pace of urban growth and the absence of energy and resource efficient buildings policies highlighting the need for an effective policy package Overall this dissertation demonstrates how energy efficient and green buildings are interlinked Green buildings reinforced with higher levels of energy efficiency and energy efficient buildings incorporating green requirements are stepping stones for achieving greater building energy and resource efficiencies And a suitable policy package fosters its development

A Guide to Integrative Pediatrics for the Healthcare Professional Sanghamitra M. Misra, Ana Maria Verissimo, 2014-06-20

In response to the rise in chronic medical conditions and the growing use of complementary and alternative therapies among pediatric and adolescent patients, healthcare practitioners are taking a serious look at pediatric integrative medicine (PIM). Although it dovetails with current concepts of preventive medicine, wellness, and patient control, PIM is still an evolving field with its own particular challenges and opportunities. *A Guide to Integrative Pediatrics for the Healthcare Professional* explores its subject through the more familiar lens of integrative medicine. This concise, comprehensive resource synthesizes the knowledge base on a range of therapies commonly associated with PIM, such as acupuncture, herbal remedies, clinical hypnosis, yoga, homeopathy, and therapeutic massage, with findings on their effective use with children. Case examples illustrate uses of PIM modalities with allopathic medicine to treat young patients at various developmental stages, and the authors pinpoint safety and appropriateness concerns, answer licensing questions, and note clinical areas requiring further study. The wide-ranging information contained here will help support interest in PIM at the research, training, and practice levels.

Features of the Guide: An introduction to basic concepts in PIM; Trends in IM; PIM education; A survey of complementary and alternative therapies, including biologically based, body-based, mind-body, energy-based, and alternative whole systems; Current evidence for IM in treating common pediatric conditions; The future of integrative pediatrics; References and links for further information; Offering a front-row seat to the continued expansion of the field.

A Guide to Integrative Pediatrics for the Healthcare Professional is a salient text not only for pediatricians but for all healthcare practitioners tasked with improving children's wellbeing.
