1 Connect the Hardware

- Unplug the power to turn off your modem, if any, and remove the backup battery if it has one.
- Place the router horizontally and orient the antennas vertically.

If your internet connection is through an Ethernet cable directly from the wall instead of through a DSL / Cable / Satellite modem, connect the Ethernet cable to the router's WAN port, and then follow steps 3 and 4 to complete the hardware connection.

Image may differ from actual product.

- 1 Connect the **powered-off** modem to the router's WAN port with an Ethernet cable.

- 2 Power on the modem, and then wait about **2 minutes** for it to restart.

- 3 Verify that the hardware connection is correct by checking the following LEDs.

Note: If the WAN LED and WAN LED are off, press the WPS button on the back for more than 2 seconds. Both the LEDs should turn solid on.

- 4 Connect the power adapter to the router and turn on the router.

2 Set Up the Network

Method ONE: Via TP-Link Tether App

- 1 Download the Tether app.

- 2 Open the Tether app and log in with your TP-Link ID.

Note: If you do not have an account, create one first.

- 3 Tap the **+** button in the Tether app and select **Router > Wireless Router**. Follow the steps to complete the setup and connect to the internet.

🎉 Enjoy the internet!

Method TWO: Via a Web Browser

- 1 Connect your device to the router wirelessly or with an Ethernet cable.

The default wireless network name (SSID) and password are printed on the label at the bottom of the router.

- 2 Launch a web browser, and enter <http://tplinkwifi.net> or <http://192.168.0.1> in the address bar. Create a password to log in. Note: If the sign window does not appear, please refer to Q1 of [Resetting](#) in this guide.

- 3 Follow the step-by-step instructions to set up the internet connection and register for the TP-Link Cloud service.

🎉 Enjoy the internet!
