

Type 30 Reciprocating Compressors

The Ingersoll Rand Type 30 was introduced in 1929 and is still one of the world leaders in heavy duty applications, where reliability, efficiency, durability and maintenance are of paramount importance to the customer.

3-Stage Lubricated

Designed for heavy duty industrial use, such as extensive service and body shops, machine shops, construction, car washes and manufacturing lines, Ingersoll Rand's 130-3 stage lubricated compressors, with their cast iron cylinders, provide the quality and performance that are required in these applications.

The 130-3 stage lubricated range comprises of Value and Premium packages, making choosing the correct machine and configuration even easier to suit your customers requirements. Both packages come in either an 11 bar g rated mounted or 14 bar g base mounted configuration.

The Value package provides an economic and dependable solution for those customers simply focused on a reliable compressed air solution and is ideal for commercial, automotive and light industrial applications.

The Premium package enhances durability and performance by offering all the features of the Value package plus a number of additional features that provide increased reliability, lower maintenance and an overall higher quality of performance. The additional features include an air-cooled aftercooler, low oil level switch and an auto condensate drain (on motor mounted units) that make the Premium package ideally suited for manufacturing and other heavy duty industrial applications.
