Textbook Of Occupational Medicine Practice (Fifth Edition) David Soo Quee Koh, Wee Hoe Gan, 2022-04-07

Following the success of the fourth edition which was highly commended in the primary health care category for the 2018 British Medical Association BMA Medical Book Awards this fifth edition has been substantially revised and updated to reflect significant changes in health care practice and to incorporate the explosion of information since the advent of the fourth industrial revolution and the COVID 19 pandemic As before the book covers target organ systems that can be affected by hazardous exposures in traditional industries and modern workplaces both of which coexist in different parts of the world and present unique occupational health challenges for the medical practitioner To this end this reference textbook focuses on the clinical presentations investigations and medical and work centric management of affected individuals We have retained consideration of some special issues relevant to occupational medicine practice in this new edition and included a new section relating to the multidisciplinary nature of occupational health practice The main emphasis continues to be prevention of disease and early detection of health effects caused by work exposures This edition of the book has been updated to include new information and references We have kept some of the previous case studies and illustrations and introduced several new ones some of which reflect the changes of practice due to the COVID 19 pandemic for example in risk communication recognition and management of the risks of health care and frontline work We have again asked international experts in occupational medicine and cross disciplinary medical specialties to jointly author many of the chapters Some of the authors are from Asia and others from Europe the United States United Kingdom and Australia All the authors have either clinical and or academic experience in or related to occupational medicine practice The book is targeted at all those who are interested in the interaction between work and health and how occupational diseases and work related disorders may present and be managed It will be of interest to medical practitioners especially those in primary care and doctors intending to pursue a career in occupational medicine It would also be relevant for allied health and safety professionals wanting to know more about health effects resulting from occupational exposures Other groups who may find this edition useful as a ready reference are medical students occupational health nurses or clinical specialists in diverse fields such as dermatology respiratory medicine infectious diseases or toxicology **Aeromedical Psychology** Carrie H. officers and pilots and astronauts and the many ways in which both psychologists and psychiatrists are involved in these roles In the second part the waiver standards put forth by both the FAA and the various branches of the military are presented as well as the waiver decision process Clinical issues unique to aviation notably fear of flying motivation to fly and airsickness are addressed as well as possible courses of intervention treatment and disposition In the final part more specialized issues pertaining to aeromedical psychology are dealt with namely the psychopharmacological research and regulations applicable to recreational pilots and aviation personnel managing the aftermath of aviation mishaps and the psychologist s role in accident investigations

Textbook Of Occupational Medicine Practice (Fourth Edition) David Soo Quee Koh,Tar-ching Aw,2017-08-22 The text is generally very readable the scientific quality of the content is above reproach and the content is very comprehensive within the confines of the size of the actual book In my opinion the book meets the needs of the varied targeted audience and I would regard it as good value for money I would consider the book useful for occupational practitioners particularly those in training who would gain a global perspective on many of the issues of occupational medicine Journal of Occupational Medicine This fourth edition continues to provide a link between occupational health and clinical practice It covers target organ systems that can be affected by hazardous exposures in workplaces and it focuses on the clinical presentations investigations and management of affected individuals We have retained consideration of some special issues relevant to occupational medicine practice in this new edition The main emphasis continues to be prevention of disease and early detection of health effects This edition of the book has been updated to include new materials topics and references We have retained a few of the previous case studies and illustrations and introduced several new ones There are new chapters on audit and evidence based practice and on occupational cancer We trust that this edition addresses many of the recommendations that were provided by readers of the previous edition We have again asked international experts to author many of the chapters Some of the authors are from Asia and others from the US UK the Middle East and Australia All the authors will have either clinical or academic experience in occupational medicine practice The book will be of interest to medical practitioners especially those in primary care and doctors intending to pursue a career in occupational medicine It would also be relevant for non medical health and safety professionals wanting to know more about health effects resulting from occupational exposures Other groups who may find this edition useful as a ready reference are medical students occupational health nurses or clinical specialists in fields such as dermatology respiratory medicine or toxicology The book is targeted at all those who are interested in the interaction between work and health and how occupational diseases and work related disorders may present Related Link s [Handbook of Aviation Neuropsychology](#) Robert Bor,Carina Eriksen,Randy J.
