Read this manual and keep for future reference.

GENERAL

This Manual is a guide to help assist with the operation of this ductless system. It does not contain the service procedures that have to be performed by a qualified HVAC service technician.

IMPORTANT

- Make sure you read this manual before you start operating your new ductless system.
- After reading this manual, if you still need more information that may not have been covered in this manual, please contact your HVAC contractor.
- To ensure comfort, make sure that temperature selection has been properly set at the remote control. To ensure efficient operation, do not block air intake or outlet at either the indoor or outdoor unit. Also, do not stand nor put items on top of outdoor and indoor units.
- If any issues with your system were to arise, please contact your HVAC contractor.
- Make sure your windows and doors are shut when operating your ductless system.

NOTICE

The refrigerant inside your ductless product uses PVE oil (Polyvinyl Ether Oil) that readily absorbs moisture from the atmosphere. To limit this "hygroscopic" action, the system should remain sealed whenever possible. If a system has been open to the atmosphere for more than 4 hours, the compressor oil must be replaced. Do not break a vacuum with air and always change the driers when opening the system for component replacement. For specific handling concerns with PVE oil, contact your HVAC contractor. Failure to follow these recommendations could result in equipment damage.

Air Split User Manual:

90.1 User's Manual American Society of Heating, Refrigerating and Air-Conditioning Engineers, 2004 This User's Manual provides detailed instruction for the design of commercial and high rise residential buildings to ensure their compliance with ANSI ASHRAE IESNA Standard 90.1-2004. In addition, this Manual encourages the user to apply the principles of effective energy conserving design when designing buildings and building systems, offers information on the intent and application of Standard 90.1, illuminates the Standard through the use of abundant sample calculations and examples, streamlines the process of showing compliance, provides Standard forms to demonstrate compliance, provides useful reference material to assist designers in efficiently completing a successful and complying design. This Manual also instructs the user in the application of several tools used for compliance with Standard 90.1: the EnvStd computer program used in conjunction with the Building Envelope Trade Off compliance method, the selection and application of energy simulation programs used in conjunction with the energy cost budget method of compliance. This Manual is intended to be useful to numerous types of building professionals including architects and engineers who must apply the Standard to the design of their buildings, plan examiners and field inspectors who must enforce the Standard in areas where it is adopted as code, general and specialty contractors who must construct buildings in compliance with the standard, product manufacturers, state and local energy offices, policy groups, utilities and others.
