

Get Set Up

You'll need to connect your AIRAVE to a router or a broadband (cable or DSL) modem.

Have a router? Please use the setup instructions on this page. Just have a modem? Please see page 2.

IF YOU HAVE A ROUTER OR ALL-IN-ONE ROUTER/MODEM:

1. Place your AIRAVE in a central location close to a window. An elevated location, such as the top of a bookshelf or tall cabinet, works best.
Please note: You should keep your AIRAVE at least 2 inches from walls and other surfaces to ensure proper airflow.
2. Connect one end of the included yellow Ethernet cable to your AIRAVE's yellow WAN port.
3. Connect the other end of the yellow Ethernet cable to an open LAN port on your router.
4. Plug the power supply connector into the black power port on your AIRAVE, and then plug the power supply into an available outlet.

5. The AIRAVE will turn on and go through an automated setup sequence that may take up to two hours. During this time, the LEDs will change color.
6. Once the Broadband, GPS and Mobile LEDs are **solid** green, your AIRAVE is ready to use. Your phone(s) will automatically connect to the AIRAVE when in range.
Please note: If the GPS light stays solid red for more than 40 minutes, please see the instructions for setting up the external GPS antenna on page 3.

When you're connected to the AIRAVE, you'll hear three short beeps at the start of each call. You may not hear the beeps the first few times after your AIRAVE is activated.
