the various aspects of public health to present and discuss continuing and new challenges to promoting the health of the public. There are many examples of these new challenges. The first volume deals with the scope of public health including its development, philosophy and change. The second volume presents the science methods and disciplines currently used by public health to identify, measure and resolve health problems. The third volume presents the applications of public health science to the resolution of the major public health problems occurring in the nineties and the public health functions critically required to achieve these objectives. **Textbook of Medical Treatment** Sir Derrick Melville Dunlop, 1968
