| 1. Would it make any sense to build space programs and rockets?           | That U.S. support them economically (training, fuel, etc.)                                 | Not really.                                                                                                                                               |
| 2. Would anyone benefit from the rockets and satellites they could build? | They would surely produce satellites that were better. They could improve delivery of aid. | They were worried about the loss of U.S. technology when U.S. tech people came to Europe. Europe, planned under the control of General Douglas MacArthur. |
| 3. Would anyone challenge U.S. power?                                     | No. Especially since the U.S. was the only superpower.                                     | Europe would no longer come under American and U.S. domination.                                                                                           |
| 4. Would the U.S. achieve other goals besides economic security?          | Yes. The governments could be persuaded to limit the nuclear weapons.                      | The American public was concerned we would not lose a technological edge.                                                                                 |
