Miller,2012-02-01 The Vegetative Soul demonstrates that one significant resource for the postmodern critique of subjectivity can be found in German Idealism and Romanticism specifically in the philosophy of nature Miller demonstrates that the perception of German Idealism and Romanticism as the culmination of the philosophy of the subject overlooks the nineteenth century critique of subjectivity with reference to the natural world This book s contribution is its articulation of a plant like subjectivity The vision of the human being as plant combats the now familiar conception of the modern subject as atomistic autonomous and characterized primarily by its separability and freedom from nature Reading Kant Goethe Hlderlin Hegel and Nietzsche Miller juxtaposes two strands of nineteenth century German thought comparing the more familiar animal understanding of individuation and subjectivity to an alternative plantlike one that emphasizes interdependence vulnerability and metamorphosis While providing the necessary historical context the book also addresses a question that has been very important for recent feminist theory especially French feminism namely the question of the possible configuration of a feminine subject The idea of the vegetative subject takes the traditional alignment of the feminine with nature and the earth and subverts and transforms it into a positive possibility Although the roots of this alternative conception of subjectivity can be found in Kant s third Critique and its legacy in nineteenth century Naturphilosophie the work of Luce Irigaray brings it to fruition **An Introduction to the Critical**

Giesen, 1988-01-01 This monograph is the most comprehensive comparative law study of legal responsibility arising from medical care presently available. It is written for doctors as well as health care administrators and legal professionals. Focusing on the problems of civil liability, it presents the development points of contact with and differences between the modern law of medical liability stemming from both the Common Law and Civil Law traditions of England, Scotland, Eire, New Zealand, Australia, Canada, the United States, South Africa, France, Belgium, West Germany, Switzerland, and Austria. It demonstrates the extent to which both problems of medical law and trends towards their solution are already familiar in these legal systems. The work describes principles and trends not by confronting the reader with national reports and separate chapters on different legal systems; rather, the relevant legal problems are analyzed from an integrative comparative viewpoint. The main thrust of the presentation is the analysis of numerous court decisions, the number of which is rising ominously in the United States on the civil liability of doctors and hospitals for damages arising from substandard treatment or inadequate disclosure of information to the patient. References to the legal and medical literature, indexes, and a refined system of cross references together with an important collection of appendices covering legal and ethical declarations make this work accessible as a handbook and reference work for the legal and social problems encountered today in the wide area of law, ethics, and medicine.
