Findley, Mary C. Findley, The worldwide Flood is one of the most discounted records in the Scriptures Yet it is supported around the world by historical accounts Take a look at feasibility studies on the safety and the stocking of the Ark The Geologic Column ought to prove that fossils reveal the age of the earth They show progression from simple to complex organisms over millions of years But do they Take a look at living fossils Meet the extinct creature found only in the oldest layers but more complex than later life forms Consider the real conditions that surrounded the Flood and the Ice Age Controversy of the Ages Theodore Cabal, Peter Rasor, II, 2018-08-08 Controversy of the Ages carefully analyzes the debate by giving it perspective Rather than offering arguments for or against a particular viewpoint on the age of the earth the authors take a step back in order to put the debate in historical and theological context The authors of this book demonstrate from the history of theology and science controversy that believers are entitled to differ over this issue while still taking a stand against theistic evolution But by carefully and constructively breaking down the controversy bit by bit they show why the age issue is the wrong place to draw a line in the sand **The Conflict of the Ages Teacher Edition I-III** Michael J. The Great Creation Debate

Brad Freckleton, 2012-07 Why isn t the evolution of flight shown in the fossil record Bugs birds bats and dinosaurs flew and are shown fully formed in the fossil record but there are no animals with halfway wings in the fossil record leading from ground based animals to flying animals What is desperately wrong with the Grand Canyon if evolution is true Where are the massive signs of erosion between the sedimentary layers of the Grand Canyon if they were laid down a million years at a time Why does massive erosion only show up at the top Animals with well developed eyes show up suddenly in the fossil record as do flying animals It s the norm for plants and animals to show up in the fossil record with the same separations as we see in different types of living animals and plants today The second law of thermodynamics is a law of science that says everything left to its own will wear out run down It is a fundamental law of science So how did evolution accidentally go up How could a DNA molecule fumble together The cell needs DNA DNA needs the cell which came first Beneficial mutations also weaken in other areas and don t write evolutionary advancing DNA code Spiral galaxies which have the shape of a star fish that is spinning quickly throughout our universe like our Milky Way galaxy are supposed to be over 10 billion years old If they were over a billion years old they would lose their spiral arm shape The arms of our galaxy the Milky Way only show a maximum age of 0 3 billion years People want to know why they re here now and where they re going to go They want surety of truth also Read this book and see how well evolution holds up in all the sciences Read this book and see if life can have meaning direction and hope with surety For those who claim to be open minded put on your seatbelts and keep your arms inside as you ride the roller coaster of your own value systems

Friend of Science, Friend of Faith

Gregg Davidson,2019-11-19 A scientist explores the harmony between Christian faith and science Though some Christians and many skeptics see science and Christianity as locked in a never ending battle geologist Gregg Davidson contends that there is tremendous harmony between Scripture and modern science Many apparent conflicts arise when the Bible is interpreted apart from its literary and historical contexts but when these are taken into account most alleged clashes resolve Proceeding from a belief that Scripture is inspired and without error and that God s creation should inform how we interpret the Bible Davidson shows that Scripture and science need not disagree on issues like the age of the earth Adam and Eve Noah s flood the origin and development of life and numerous related topics Rather Christians can rejoice at how God s glory is revealed in both the Bible and the natural world

John Doyle, 2018-09-01 This book is a critical examination of the philosophical and moral issues in relation to human enhancement and the various related medical developments that are now rapidly moving from the laboratory into the clinical realm In the book the author critically examines technologies such as genetic engineering neural implants pharmacologic enhancement and cryonic suspension from transhumanist and bioconservative positions focusing primarily on moral issues and what it means to be a human in a setting where technological interventions sometimes impact strongly on our humanity The author also introduces the notion that death is a process rather than an event as well as identifies philosophical and clinical limitations in the contemporary determination of brain death as a precursor to organ procurement for transplantation The discussion on what exactly it means to be dead is later applied to explore philosophical and clinical issues germane to the cryonics movement Written by a physician scientist and heavily referenced to the peer reviewed medical and scientific literature the book is aimed at advanced students and academics but should be readable by any intelligent reader willing to carry out some side reading No prior knowledge of moral philosophy is assumed as the various key approaches to moral philosophy are outlined early in the book **Teaching Biological Evolution in Higher Education** Brian J. The Transition, Initiated by Copernicus and Galileo, from Religion to Science Lawrence Wood, 2017-07-06 Have you ever wondered Why two diametrically opposite explanations of ourselves Religion and Science coexist As this book explains the reason is one explanation began before the other The first explanations development began thousands of years ago when our gradually evolving brains and minds awoke to an unknown possibly threatening environment Unfortunately attempts to explain this strange environment were frustrated by illusions such as the apparent motion of the sun moon and stars around the earth which clouded our limited observational capability such as our inability detect constant motion thwarting the developing human minds ability to correctly explain observations These limitations ultimately led to a totally incorrect explanation we reside in a very small young unchanging universe revolving about us created by a supernatural being God a belief system termed Religion About 500 years ago the formulation of the second explanation was initiated when astute investigators such as Copernicus and Galileo using improved new observation instruments such as the telescope and microscope began to realize the existing illusion based religious explanations could not possibly be correct Author Lawrence Wood introduces the brilliant investigators who resolved the illusions by developing radically new explanations of the illusions an explanation system termed Science many still cannot accept hence the coexistence of religion and science If you are one of those trying to bridge the gulf between your religious beliefs which have become increasingly difficult to accept and the strange new world of science this book will help you immeasurably
